Euronext is a regulated market for the purpose of Directive 2014/65/EU (as amended, "**MiFID II**"). The Programme also permits Notes to be issued on the basis that they will not be admitted to listing, trading and/or quotation by any competent authority, stock exchange and/or quotation system or to be admitted to listing, trading and/or quotation by such other or further competent authorities, stock exchanges and/or quotation systems as may be agreed with the Issuer.

No Notes may be issued under the Programme with a denomination of less than Euro 100,000 (or its equivalent in any other currency).

Unauthorised information

No person has been authorised to give any information or to make any representation not contained in or not consistent with this Base Prospectus or any other document entered into in relation to the Programme or any information supplied by the Issuer or such other information as is in the public domain and, if given or made, such information or representation should not be relied upon as having been authorised by the Issuer or any Dealer.

Neither the Dealers nor any of their respective affiliates have authorised the whole or any part of this Base Prospectus and none of them makes any representation or warranty or accepts any responsibility or liability as to the accuracy or completeness of the information contained in or incorporated by reference in this Base Prospectus or any other information provided by the Issuer in connection with the Programme. Neither the delivery of this Base Prospectus or any Final Terms nor the offering, sale or delivery of any Note shall, in

any circumstances, create any implication that the information contained in this Base Prospectus is true subsequent to the date hereof or the date upon which this Base Prospectus has been most recently amended or supplemented or that there has been no adverse change, or any event reasonably likely to involve any adverse change, in the prospects or financial or trading position of the Issuer since the date thereof or, if later, the date upon which this Base Prospectus has been most recently amended or supplemented or that any other information supplied in connection with the Programme is correct at any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

Restriction on distribution

The distribution of this Base Prospectus and any Final Terms and the offering, sale and delivery of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Prospectus or any Final Terms comes are required by the Issuer and the Dealers to inform themselves about and to observe any such restrictions. For a description of certain restrictions on offers, sales and deliveries of Notes and on the distribution of this Base Prospectus or any Final Terms and other offering material relating to the Notes, see "*Subscription and Sale*". In particular, Notes have not been and will not be registered under the United States Securities Act of 1933 (as amended) (the "**Securities Act**"), or with any securities regulatory authority of any state or other jurisdiction of the United States, and are subject to U.S. tax law requirements. Subject to certain exceptions, Notes may not be offered, sold or delivered, directly or indirectly, within the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**").

Neither this Base Prospectus nor any Final Terms constitutes an offer or an invitation to subscribe for or purchase any Notes and should not be considered as a recommendation by the Issuer, the Dealers or any of them that any recipient of this Base Prospectus or any Final Terms should subscribe for or purchase any Notes. Each recipient of this Base Prospectus or any Final Terms shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the Issuer.

IMPORTANT – PROHIBITION OF SALES TO EEA RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or (ii) a customer within the meaning of Directive 2016/97/EU (as amended, the "**Insurance Mediation Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

MiFID II product governance / target market

The Final Terms in respect of any Notes will include a legend entitled "MiFID II product governance" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

RISK FACTORS

An investment in Notes involves certain risks including those described below. Prospective investors should carefully consider the matters and information set forth below regarding the factors that may affect the ability of the Issuer to fulfil its obligations under the Notes. In addition, factors which are material for the purpose of assessing the market risks associated with Notes issued under the Programme are also described below. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. If any of the following risks actually occurs, the trading price of the Notes could decline and an investor could lose all or part of its investment. Additional risks not currently known to the Issuer or risks that the Issuer presently deems immaterial may subsequently harm the Issuer and affect an investor's investment.

The Issuer believes that the factors described below represent the material risks inherent in investing in Notes issued under the Programme, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Notes may occur for other reasons and the Issuer does not represent that the statements below regarding the risks of holding any Notes are exhaustive. Prospective investors should also read the detailed information set out elsewhere in this Base Prospectus and reach their own views prior to making any investment decision.

Although the most material risk factors have been presented first within each category, the order in which the remaining risks are presented is not necessarily an indication of the likelihood of the risks actually materialising, of the potential significance of the risks or of the scope of any potential negative impact to the Issuer's business, financial condition, results of operations and prospects. The Issuer may face a number of these risks described below simultaneously and some risks described below may be interdependent. While the risk factors below have been divided into categories, some risk factors could belong in more than one category and prospective investors should carefully consider all of the risk factors set out in this section.

The purchase of certain Notes may be suitable only for investors who have the knowledge and experience in financial and business matters necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should make such inquiries as they deem necessary without relying on the Issuer or any Dealer and before making an investment decision with respect to any Notes, prospective investors should consult their own stockbroker, bank manager, lawyer, accountant or other financial, legal and tax advisors and carefully review the risks entailed by an investment in the Notes and consider such an investment decision in the light of the prospective investor's personal circumstances.

Words and expressions defined in the "Terms and Conditions of the Notes" below or elsewhere in this Base Prospectus have the same meanings in this section.

Risks relating to the Issuer

Risks related to the Issuer's financial situation

(Re)financing risk

The Issuer finances itself by use of financial markets. Therefore, the Issuer is sensitive to general financial market conditions and more specific the Issuer is facing a substantial increase in financing needs in the future years due to the energy transition in The Netherlands. The Issuer seeks external financing, either in the form of public or private financing or other arrangements, which may not be available on attractive terms or may not be available at all. As a consequence, the Issuer might not be able to invest as scheduled. Any limitations on the Issuer's ability to invest as scheduled, could affect the Issuer's cash flows, and affect its ability to execute its strategic plans, which could have a material adverse effect on the Issuer's business, financial condition and profitability.

Credit Rating Risk

The Issuer's current credit rating has been issued by credit rating agency S&P Global Ratings Europe Limited ("S&P"). There is a the risk of a negative adjustment of the credit rating of the Issuer resulting from changes implemented by S&P with respect to rating criteria, rating method or assumptions. A lower credit rating could affect the Issuer's access to capital and money markets, financing costs and the terms and conditions imposed by parties in the business sector, which in turn may have an adverse impact on the Issuer's revenues, profits, cash flows and financial position.

Counterparty risk

Counterparty risk is the risk that a counterparty cannot or will not meet its delivery or payment obligations. This risk is primarily encountered in interest rate and foreign currency hedge transactions. This risk is for the Issuer mainly related to cross currency interest rate swaps which the Issuer has executed to hedge the currency and interest rate risk on (US) private placements. If such counterparty risk materialises, this may negatively influence the net profit, cash flows and the financial position of the Issuer.

Market risk

Due to the type of business in general, the financial position and (operating) cash flows of the Issuer may be adversely affected by changes in market prices of:

- commodities (e.g. energy); and
- financials (e.g. interest rates, exchange rates, inflation).

The commodity price risk relates mainly to the procurement of electricity due to the fact that the grid operators have to replace electricity that is lost during the distribution (technical loss, measurement failures and energy theft). The annual average grid losses of the Issuer and its subsidiaries (together "**Stedin Group**") are estimated at approximately 1 TWh.

The typical characteristics of commodity markets - in particular illiquidity, from time to time - may cause considerable changes in commodity prices and therefore may influence the cash flows and financial position of the Issuer.

Risks related to the Issuer's business activities and industry

Risk related to energy transition on electricity and gas infrastructure

Climate policy in The Netherlands is aimed at transforming the current energy system, mainly based on fossil fuels, into a low-carbon energy system based on renewable energy sources and low-carbon energy technology. The Climate Agreement (2019) provides a roadmap for this transformation. The focus is on a substantial growth in the share of sustainable electricity, a substantial growth in the number of electric cars, a substantial reduction in greenhouse gas emissions in industry and a more sustainable building environment. This transition has a major impact on Stedin Group's gas and electricity distribution networks. This involves a number of risks.

In the first place, the return on Stedin Group's existing assets may decrease due to early depreciation of parts of our gas network. Secondly, customer requests and required deeper network investments can increase too much, which makes it difficult for the Issuer to connect new customers on time and to have sufficient transport capacity available on time. This can lead to social dissatisfaction and, as a result, to stricter regulation of network operators.

Risks related to availability and outflow of employees with the required technical competencies

Due to the energy transition and economic growth, the Issuer faces increased capex programs for electricity grid expansions, connections and maintenance of existing grids. As a result, there is a greater need for fitters, site managers, engineers and project leaders. At the same time there is a decrease in technical trained personnel which are entering the labour market and at Stedin Group an increase in technical staff nearing their retirement. As the future volume of work will increase, a large replacement and increase of employees still remains an issue. Due to the specific expertise required for most positions, new technical employees need to be trained over a period of up to two years. Furthermore the Issuer uses a strategic personnel plan to map where this risk will materialise in order to take action accordingly. Even taking these initiatives into account there remains a future risk that Stedin Group no longer has sufficient staff with the required technical competencies to facilitate the energy transition. This can impact the grid performance, customer satisfaction, financial flexibility and/or cashflows and ability to execute its strategic plans.

Risk related to business continuity

The continuity of the service provided by the Issuer could be threatened by situations such as (a) large-scale interruptions in IT systems which could be caused by a cyberattack (b) the unavailability of key people in the organisation or (c) the access to main operating buildings to manage the networks. Such situations may

affect the customers in the form of an interruption in the supply of energy, untimely invoices or a lower level of service and may affect Stedin Group with additional cost and delays in the incoming cash flows. Furthermore, as a result of its strategic location and its social and economic importance, the Stedin Group infrastructure is an attractive target for cyberattacks.

IT landscape insufficiently prepared for the future

As a result of growing digitalization of its operations, Stedin Group is increasingly dependent on the robustness, operability and security of its information technology systems. This dependence results in a growing complexity of data governance and handling. The availability, integrity and confidentiality of such information systems is fundamental for day-to-day business operations. Due to their complexity and scale there is a risk that large information technology projects will not be ready in time, are not executed within the approved budget or will not deliver the expected financial benefits and operational performance. This might lead to suboptimal grid management, inefficient investments according to the benchmark which comprises of the other grid operators in The Netherlands and set by the Dutch regulator to enforce efficiency. This might have an adverse impact on regulatory compensation and the financial position of the Issuer.

Risk related to significant infrastructure defects

The Issuer's highest priority with respect to the electricity grids is preventing interruptions in supply through measures such as station automation for grid control, replacement of fault-sensitive components and preventing damage resulting from excavation. In addition, the Issuer endeavours to replace components that will no longer be available in the near future and it is taking steps to enhance the reliability of public lighting networks.

With respect to the gas networks, maintenance has the highest priority of the Issuer in order to prevent gas leaks and maintain the supply of gas. This maintenance focuses primarily on the replacement of connections that are in substandard condition and the replacement of distribution pipelines that are reaching the end of their expected useful lifespan. The replacement of pipelines prevents gas leaks and more costly repairs. To prevent inconvenience and to reduce total costs, activities are carried out simultaneously with work on other infrastructure (roads, railways, sewers), where possible. Stedin Group aims to achieve lower interruption duration on its networks than its own norm and below the national average. Nevertheless the complexity of the network and the large factors that can harm the infrastructure a net risk remain whereby, interruption may result in additional costs (e.g. repair, reconstruction, and claimed damage) and therefore may negatively influence the net profit, cash flows and the financial position of the Issuer.

Stedin Group aims to achieve lower interruption duration on its networks than its own norm and below the national average. Nevertheless, interruption may result in additional costs (e.g. repair, reconstruction, and claimed damage) and therefore may negatively influence the net profit, cash flows and the financial position of the Issuer.

Legal and regulatory risk

Impact of the Dutch regulatory framework and related risks

The Issuer is the holding company which owns directly 100 per cent of the shares in Stedin Netbeheer B.V. ("**Stedin Netbeheer**") and indirectly 100 per cent of the shares in Enduris B.V. ("**Enduris**"); both of whom are regulated Dutch grid companies (the "**Grid Companies**"). The Grid Companies account for more than 90 per cent. of the consolidated revenue, annual profit and total assets of the Issuer as at 31 December 2018.

The regulated activities of Stedin Group depend on governmental licenses, authorisations, exemptions and/or dispensations in order to operate its business. These governmental licenses, authorisations, exemptions and/or dispensations may be subject to withdrawal, amendment and/or additional conditions being imposed on the regulated activities of Stedin Group which could affect the revenues, profits and financial position of the Issuer.

As a consequence of the strong dependence on governmental regulations and European legislation, the Issuer's revenues, profits, cash flows and financial position may be affected by changes to the regulatory environment.

The Energy Department of the Dutch Authority for Consumers and Markets (*Autoriteit Consument & Markt*, the "ACM") supervises the correct implementation of the Electricity Act 1998 (*Elektriciteitswet 1998*) and the Gas Act (*Gaswet*). The ACM ensures the effective and efficient functioning of the energy market and the protection of customer interests through the implementation of various regulatory instruments. This includes safeguarding access to networks, maintaining sufficient transparency (access to essential information) and protecting consumers against potential malpractices.

The ACM monitors the capability of the Grid Companies to meet the financial requirements for managing the electricity and gas grid, including required and planned investments. The Grid Companies submit their statutory and regulatory financial statements to the ACM annually, including results, assets and infrastructure related activities (maintenance and investments). Furthermore end-user tariffs for the distribution of electricity and gas (which generates the revenues for the Grid Companies) are controlled by the ACM and depend on a series of consecutive regulatory decisions, in particular the Regulation Method Decision, the Efficiency Discount Decision (x-factor), Quality Factor Decision (q-factor) and the Accounting Volume Decision, which are applicable to a certain price control period (the "Method Decisions"), and finally the annual tariff decisions.

The Grid Companies are through the regulation method subjected to a yard stick competition. A Grid Company is allowed to charge the average sector cost through regulated tariffs to its customers. Two types of costs however are not subjected to the yard stick competition: sufferance's taxes and the cost of buying transport volumes from other grid companies. The regulator estimates these costs beforehand and reimburses or deducts any differences compared to the actuals, in effect two years later. Sufferance's taxes and the actual costs of transport will fluctuate over time and can therefore have a negative impact on the Issuer's financial position and cash flows. For Stedin Group 98% of the transport volumes are bought from the TSO TenneT.

The Method Decisions for the new regulatory period published by the ACM at the end of 2016 apply for the longest legally possible period of 5 years. By opting for this long term, the ACM aims to stimulate Dutch grid operators to operate efficiently and also to offer customers as much tariff stability as possible.

For the current regulation period (2017 – 2021), the Efficiency Discount Decision (x-factor) will lead to annually decreasing transport tariffs for gas and electricity. As the Issuer's revenue significantly depends on the transport tariffs (as determined by the regulatory framework described above) this is expected to have a negative impact on its financial position and cash flows.

The level of permitted revenues of the Grid Companies includes a component based on the real weighted average costs of capital ("WACC"). The variables used to calculate the WACC consist of estimates for the cost of equity, the cost of debt, the relative percentages of debt and equity in the capital structure, the corporate tax rate and the consumer price index. The cost of equity represents the expected return on investment for the shareholders. The Issuer is the sole direct and indirect shareholder of the Grid Companies. The cost of debt represents the expected cost of debt for a company with an "A" credit rating. As is the case for almost all other cost factors, the ACM bases the WACC on data which precede the regulation period for which the WACC is determined. Thus, the WACC may incorrectly reflect the costs of capital which the Grid Companies will effectively incur during the relevant regulation period. For the current tariff regulation period (2017 - 2021), the estimated cost of equity is set at 5.02 per cent. while the cost of debt develops from 3.58 per cent. at the theoretical starting point of 2016 to 2.29 per cent. in 2021. In addition, the actual capitalisation of the Grid Manager may differ from the 50/50 debt/equity ratio assumed in the Method Decisions, which would also have an impact on the profitability of the Grid Companies. Finally, the actual corporate tax rate may deviate from the corporate tax rate assumed in the Method Decisions, which would have an impact on the profitability of the Grid Companies.

Changes to both the Electricity Act (*Elektriciteitswet*) and Gas Act (*Gaswet*) have recently passed in parliament. The financial impact of losses in the gas networks are now the responsibility of the Grid Companies per 1 January 2020. In addition, the entire connection of wholesale customers in the gas market will be a tariff-regulated task per 1 January 2020 (formerly non-regulated business). The regulator provides extra tariff space to accommodate these new tasks.

At the date of this Base Prospectus, the ministry is working on a new energy act, which should consolidate the existing Electricity Act and Gas Act and should aim to simplify the existing legislation, adjust the Dutch legislation to relevant European legislation and insert flexibility to comply with requirements for the Dutch renewable energy transition. A first draft is due by the end of 2019 for consultation purpose (but has been

postponed several times already) and the new legislation should not come into force before 2022. This new legislation and other potential future changes in legal and regulatory requirements may have a negative impact on the Issuer's financial position and cash flows.

Risk related to the profits in the metering domain

The tariffs that grid operators charge for the rent of small volume meters are regulated and based on the ministerial regulation on metering tariffs (*Regeling meettarieven*). This regulation specifies how the ACM determines these tariffs. At present, the maximum tariffs that grid operators are allowed to charge are based on the average tariffs of 2005 plus an annual adjustment for inflation using the consumer price index. The ACM has been monitoring the costs of carrying out the process of metering since 2011 for the electricity meters and 2012 for the gas meters. The differences observed by the ACM each year between the tariff revenues on the one hand and the operating costs, depreciation and taking into account the applicable WACC on the other hand are labelled as surplus profit. The Minister of Economic Affairs and the grid operators expect that these surplus profits will be sufficient to cover the costs attributable to smart meters in the period until 2020. The ministerial regulation on metering tariffs ensures that the tariffs paid by consumers will not exceed the amount that is necessary to cover the costs for the roll out of these smart meters. To achieve this, the ACM may include surplus profits in its future decisions on tariffs. Based on current estimates, the surplus profit realised by Stedin Group is sufficient to finance the extra regulatory costs for the rollout of smart meters without tariff increases. For this reason, Stedin Group has kept the metering tariff at the same level since 2015. Due to a more than expected efficient rollout of the smart meters the historical profits will remain in excess so Stedin Group decided to start with the repayment of them by substantially lower the tariffs in 2018 and 2019. Stedin Group aims to have the surplus profits reduced to zero at the end of 2023. This to prevent that the ACM will adjust the tariffs unexpectedly. The controlled repayment will have a negative impact on the Issuer's financial position and cash flows.

Risk relating to the Notes

Risks related to the nature of a particular Series of the Notes

The Notes may be redeemed prior to maturity

In the event that the Issuer would be obliged to increase the amounts payable in respect of any Notes due to any withholding or deduction for or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by or on behalf of The Netherlands or any political subdivision thereof or any authority therein or thereof having power to tax, the Issuer may redeem all outstanding Notes in accordance with the Conditions.

In addition, the Conditions provide that the Notes are redeemable at the Issuer's option in certain other circumstances and accordingly the Issuer may choose to redeem the Notes at times when prevailing interest rates may be relatively low. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate at the same level as that of the Notes. Potential investors should consider reinvestment risk in light of other investments available at that time.

An optional redemption feature of Notes is likely to limit their market value. During any period when the Issuer may elect to redeem Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

Notes issued, if any, as "Green Bonds" may not be a suitable investment for all investors seeking exposure to green assets

The Final Terms relating to any specific Tranche of Notes may provide that it will be the relevant Issuer's intention to apply the proceeds from an offer of those Notes specifically for Eligible Green Projects (as defined in the section entitled "*Use of Proceeds*" below). Prospective investors should determine for themselves the relevance of such information for the purpose of any investment in such "Green Bonds" together with any other investigation such investor deems necessary. In particular, no assurance is given by the Issuer or the Dealers that the use of such proceeds for any Eligible Green Projects, and in the event that any Notes are listed or admitted to trading on any dedicated green, environmental, social, sustainable or other equivalently-labelled segment of any stock exchange or securities market (whether or not regulated) that such listing or admission, will satisfy, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or

its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental impact of any projects or uses, the subject of or related to, any Eligible Green Projects. Also, no assurance is given by the Issuer or the Dealers that any such listing will be obtained in respect of any Notes or, if obtained, that any such listing or admission to trading will be maintained during the life of the Notes. Furthermore, it should be noted that there is currently no clearly defined definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes, a “green” or “sustainable” or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as “green” or “sustainable” or such other equivalent label nor can any assurance be given that such a clear definition or consensus will develop over time. Accordingly, no assurance is or can be given to investors that any projects or uses the subject of, or related to, any Eligible Green Projects will meet any or all investor expectations regarding such “green”, “sustainable” or other equivalently-labelled performance objectives or that any adverse environmental, social and/or other impacts will not occur during the implementation of any projects or uses the subject of, or related to, any Eligible Green Projects.

In connection with the issue of Green Bonds under the Programme, one or more sustainability rating agencies or sustainability consulting firms may be requested to issue a second-party opinion confirming that the Eligible Green Projects have been defined in accordance with the broad categorisation of eligibility for green projects set out by the International Capital Market Association (ICMA) Green Bond Principles and/or a second-party opinion regarding the suitability of the Notes as an investment in connection with certain environmental and sustainability projects (any such second-party opinion, a “**Second-party Opinion**”). A Second-party Opinion is not, nor shall it be deemed to be, incorporated in and/or form part of this Base Prospectus. A Second-party Opinion may not reflect the potential impact of all risks related to the structure, market, additional risk factors discussed above and other factors that may affect the value of the Notes or the projects financed or refinanced toward an amount corresponding to the net proceeds of the relevant issue of Notes in the form of “Green Bonds”. A Second-party Opinion would not constitute a recommendation to buy, sell or hold securities and would only be current as of the date it is released. In addition, although the Issuer may agree at the time of issue of any Green Bonds to certain reporting and use of proceeds it would not be an event of default under the Notes if the Issuer were to fail to comply with such commitments. A withdrawal of the Second-party opinion may adversely affect the value of such Notes and/or may have adverse consequences for certain investors with portfolio mandates to invest in green assets. Notes issued, if any, as “Green Bonds” may not be a suitable investment for all investors seeking exposure to green assets. Currently, the providers of a Second-party Opinion are not subject to any specific regulatory or other regime or oversight. The matters described in this paragraph equally apply to any other “Green Bond” verifications, certifications, scorings or ratings from time to time issued by any person in relation to any Notes issued as “Green Bonds”.

The Notes may have features, which contain particular risks for potential investors

A wide range of Notes may be issued under the Programme. A number of these Notes may have features, which contain particular risks for potential investors. Set out below is a description of the most common of such features:

Interest rate risks

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.

Noteholders will not be able to calculate in advance their rate of return on Floating Rate Notes

A key difference between Floating Rate Notes and Fixed Rate Notes is that interest income on Floating Rate Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods. If the terms and conditions of the Notes provide for frequent interest payment dates, investors are exposed to the reinvestment risk if market interest rates decline. That is, investors may reinvest the interest income paid to them only at the relevant lower interest rates then prevailing. In addition, the Issuer's ability to issue Fixed Rate Notes may affect the market value and secondary market (if any) of the Floating Rate Notes (and *vice versa*).

Zero coupon Notes are subject to higher price fluctuations than non-discounted Notes

Changes in market interest rates generally have a substantially stronger impact on the prices of zero coupon Notes than on the prices of ordinary notes because the discounted issue prices are substantially below par. If market interest rates increase, zero coupon Notes can suffer higher price losses than other notes having the same maturity and credit rating.

Fixed/Floating Rate Notes

Fixed/Floating Rate Notes may bear interest at a rate that converts from a fixed rate to a floating rate, or from a floating rate to a fixed rate. Where the Issuer has the right to effect such a conversion, this will affect the secondary market and the market value of the Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate in such circumstances, the spread on the Fixed/Floating Rate Notes may be less favourable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate in such circumstances, the fixed rate may be lower than then prevailing rates on its Notes.

Notes issued at a substantial discount or premium

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

Certain benchmark rates, including LIBOR and EURIBOR, may be discontinued or reformed in the future - including the potential phasing-out of LIBOR after 2021

The London Interbank Offered Rate ("**LIBOR**"), the Euro Interbank Offered Rate ("**EURIBOR**") and other interest rate or other types of rates and indices which are deemed to be benchmarks are the subject of ongoing national and international regulatory discussions and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented.

Regulation (EU) No. 2016/1011 (the "**Benchmark Regulation**") on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds became applicable from 1 January 2018. The Benchmark Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark, within the EU. The Benchmark Regulation could have a material impact on any Notes linked to LIBOR, EURIBOR or another benchmark rate or index, in particular, if the methodology or other terms of the benchmark are changed in order to comply with the terms of the Benchmark Regulation, and such changes could (amongst other things) have the effect of reducing or increasing the rate or level, or affecting the volatility of the published rate or level, of the benchmark. More broadly, any of the international, national or other proposals for reform, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or contribute to certain "benchmarks," trigger changes in the rules or methodologies used in certain "benchmarks" or lead to the discontinuance or unavailability of quotes of certain "benchmarks."

As an example of such benchmark reforms, on 27 July 2017, the UK Financial Conduct Authority announced that it will no longer persuade or compel banks to submit rates for the calculation of the LIBOR benchmark after 2021 and, on 12 July 2018, announced that the LIBOR benchmark may cease to be a regulated benchmark under the Benchmark Regulation. Such announcements indicate that the continuation of LIBOR on the current basis (or at all) cannot and will not be guaranteed after 2021.

Additionally, in March 2017, the European Money Markets Institute (the "**EMMI**") (formerly EURIBOR-EBF) published a position paper referring to certain proposed reforms to EURIBOR, which reforms aim to clarify the EURIBOR specification, to develop a transaction-based methodology for EURIBOR and to align the relevant methodology with the Benchmark Regulation, the IOSCO Principles for Financial Benchmarks and other regulatory recommendations. EMMI has since indicated that there has been a "change in market activity as a result of the current regulatory requirements and a negative interest rate environment" and

"under the current market conditions it will not be feasible to evolve the current EURIBOR methodology to a fully transaction-based methodology following a seamless transition path". EMMI has since strengthened its governance framework and has developed a hybrid methodology for EURIBOR.

Separate workstreams are also underway in Europe to reform EURIBOR using a hybrid methodology and to provide a fallback by reference to a euro risk-free rate (based on a euro overnight risk-free rate as adjusted by a methodology to create a term rate). A working group on euro risk-free rates was established to identify and recommend risk-free rates that could serve as a basis for an alternative to current benchmarks used in a variety of financial instruments and contracts in the euro area, such as the euro overnight index average (EONIA) and the euro interbank offered rate (EURIBOR). This is a private sector working group; the ECB provides the secretariat and attends as an observer only. The group recommended on 13 September 2018 that the euro short-term rate ("€STR") be used as the risk-free rate for the euro area and is now focused on supporting the market with transitioning. The ECB published the €STR for the first time on 2 October 2019, reflecting trading activity on 1 October 2019. In addition, on 21 January 2019, the euro risk free-rate working group published a set of guiding principles for fallback provisions in new euro denominated cash products (including bonds). The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts may increase the risk to the euro area financial system.

In addition, on 29 November 2017, the Bank of England and the UK Financial Conduct Authority announced that, from January 2018, its Working Group on Sterling Risk-Free Rates has been mandated with implementing a broad-based transition to the Sterling Overnight Index Average ("SONIA") over the next four years across sterling bond, loan and derivative markets, so that SONIA is established as the primary sterling interest rate benchmark by the end of 2021.

At this time, it is not possible to predict the effect of any establishment of alternative reference rates or any other reforms to LIBOR that may be enacted in the United Kingdom or elsewhere. Uncertainty as to the nature of such alternative reference rates or other reforms may adversely affect the trading market for LIBOR-linked securities. The potential elimination of benchmarks, such as LIBOR, the establishment of alternative reference rates or changes in the manner of administration of a benchmark could also require adjustments to the terms of benchmark-linked securities and may result in other consequences, such as interest payments that are lower than, or that do not otherwise correlate over time with, the payments that would have been made on those securities if the relevant benchmark was available in its current form.

The elimination of the LIBOR benchmark or any other benchmark, or changes in the manner of administration of any benchmark, could require or result in an adjustment to the interest calculation provisions of the Conditions (as further described in Condition 7(j) (*Benchmark Discontinuation*)), or result in adverse consequences to holders of any Notes linked to such benchmark (including Floating Rate Notes whose interest rates are linked to LIBOR, EURIBOR or any other such benchmark that is subject to reform). Furthermore, even prior to the implementation of any changes, uncertainty as to the nature of alternative reference rates and as to potential changes to such benchmark may adversely affect such benchmark during the term of the relevant Notes, the return on the relevant Notes and the trading market for securities (including the Notes) based on the same benchmark.

The Conditions provide for certain fallback arrangements in the event that a published benchmark, such as LIBOR, (including any page on which such benchmark may be published (or any successor service)) becomes unavailable, including the possibility that the rate of interest could be set by reference to a successor rate or an alternative rate and that such successor rate or alternative reference rate may be adjusted (if required) in order to reduce or eliminate, to the extent reasonably practicable in the circumstances, any economic prejudice or benefit (as applicable) to investors arising out of the replacement of the relevant benchmark, although the application of such adjustments to the Notes may not achieve this objective. Any such changes may result in the Notes performing differently (which may include payment of a lower interest rate) than if the original benchmark continued to apply. In certain circumstances the ultimate fallback of interest for a particular Interest Period may result in the rate of interest for the last preceding Interest Period being used.

This may result in the effective application of a fixed rate for Floating Rate Notes based on the rate which was last observed on the Relevant Screen Page. In addition, due to the uncertainty concerning the availability of successor rates and alternative reference rates and the involvement of an Independent Advisor (as defined in the Conditions) (including the possibility that a license or registration may be required for such agent or any administrator under the applicable legislation), the relevant fallback provisions may not operate as intended at the relevant time.

Any such consequences could have a material adverse effect on the value of and return on any such Notes.

The application of the fallback provisions contained in Condition 7(j) may lead to a conflict of interests of the Issuer, the Independent Advisor and Noteholders including with respect to certain determinations and judgments that the Independent Advisor may make pursuant to Condition 7(j) that may influence the amount receivable under the Notes.

Investors should consult their own independent advisors and make their own assessment about the potential risks imposed by the Benchmark Regulation reforms in making any investment decision with respect to any Notes linked to or referencing a benchmark.

Exchange rate risks and exchange controls

The Issuer will pay principal and interest on the Notes in the Specified Currency (as defined in the Terms and Conditions of the Notes). This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (1) the Investor's Currency-equivalent yield on the Notes, (2) the Investor's Currency-equivalent value of the principal payable on the Notes and (3) the Investor's Currency-equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

Risks related to all Series of the Notes

Modification and waivers

The Conditions contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority.

The Notes and these Conditions may be amended without the consent of the Noteholders to correct a manifest error. In addition, the parties to the Agency Agreement may agree to modify any provision thereof, without the consent of the Noteholders, if it is of a formal, minor or technical nature, it is made to correct a manifest error or it is, in the opinion of such parties, not materially prejudicial to the interests of the Noteholders. Any such modification may be contrary to the interest of one or more Noteholders.

Changes resulting from the EU Anti-Tax Avoidance Directive

As part of its anti-tax avoidance package the EU Council adopted the Anti-Tax Avoidance Directive on 12 July 2016 in Council Directive (EU) 2016/1164 ("**ATAD 1**"). ATAD 1 must be implemented by each EU Member State as of 1 January 2019. On 29 May 2017 additional measures were introduced in Council Directive (EU) 2017/952 to neutralize the effects of hybrid mismatches with third countries ("**ATAD 2**"). The measures introduced in ATAD 2 must be implemented ultimately by 1 January 2020 and 1 January 2022 (to the extent relating to reverse hybrid mismatches).

The exact scope of these two measures, and impact on the Issuer's tax position, will depend on the implementation of the measures in the relevant EU Member State, but such measures could have a material adverse effect on the Issuer and, as a consequence, the Notes. The measures in ATAD 1 and ATAD 2 are minimum standards and, therefore, it is at the discretion of each EU Member State to implement measures in domestic law that go beyond the measures proposed in ATAD 1 and ATAD 2.

In relation to ATAD 1, the Dutch government has currently implemented this directive into Dutch laws as a result of which as of 1 January 2019 ATAD 1 (including the so-called "earnings stripping rule") came into force in The Netherlands. Given that under ATAD 1 the deduction of *net* borrowing costs will be

limited to 30% of a taxpayer's adjusted EBITDA (to which a €1.0 million threshold applies), ATAD 1 may have an adverse effect on the Issuer and its financial position in The Netherlands.

In relation to ATAD 2, on 29 October 2018 the Dutch government published a draft legislative proposal as part of a public consultation ended on 10 December 2018. A legislative proposal implementing ATAD 2 has been published by the Dutch government and has not yet been adopted by Dutch parliament. The actual scope and implications of ATAD 2 in relation to the Notes are unascertainable pending the legislative process in Dutch parliament. Investors should consult their professional advisors on the tax consequences of their acquiring, holding and disposing of a Note in relation to ATAD 2.

Dutch tax risks related to the Dutch government's approach on tax avoidance and tax evasion

On 17 September 2019, the Dutch government released its Tax Plan 2020 as part of Budget Day 2019 which includes, among others, a legislative proposal relating to the introduction of a conditional withholding tax on interest and royalties that may become relevant in the context of the Dutch tax treatment of the Issuer, the Notes and/or payments by it in respect of the Notes.

According to the legislative proposal implementing the conditional interest withholding tax, interest paid by the Issuer to an affiliated entity in a low-tax jurisdiction will be subject to a withholding tax of 21.7% as of 1 January 2021. An entity is regarded as 'affiliated' if it, either alone or as part of a group acting in concert, can exercise decisive influence to determine the Issuer's activities, which is in any event the case if the entity holds at least 50% of the Issuer's statutory voting rights.

For this purpose 'low-tax jurisdictions' are jurisdictions which are (i) on the Dutch list for jurisdictions with a statutory corporate tax rate of less than 9 % and (ii) on the EU list for non-cooperative jurisdictions, together ("**Listed Countries**"). Currently, the Listed Countries are Anguilla, Bahama's, Bahrein, Belize, Bermuda, British Virgin Islands, Cayman Islands, Fiji, Guam, Guernsey, Isle of Man, Jersey, Kuwait, Marshall Islands, Oman, Qatar, Samoa, Saudi-Arabia, Trinidad and Tobago, Turks and Caicos Islands, United Arab Emirates, US Samoa, US Virgin Islands, and Vanuatu. The Dutch list of low-taxed jurisdictions is to be updated annually on 1 October and is applicable to the next calendar year.

Apart from direct payments made to affiliated companies in Listed Countries, the withholding tax may also apply to situations where artificial structures are put in place with the main purpose or one of the main purposes to avoid the Dutch withholding tax, e.g. where an interest or royalty payment to a Listed Country is artificially routed via an intermediate company in a non-Listed Country.

If the legislative proposal would apply to payments under the Notes it may have a material adverse effect on the Issuer and its financial position and could result in the Issuer exercising its rights pursuant to the Conditions, set out herein, to redeem the Notes.

The proposed financial transactions tax ("FTT")

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**"). However, Estonia has since stated that it will not participate.

The Commission's Proposal has a very broad scope and could, if introduced, apply to certain dealings in Notes (including secondary market transactions) in certain circumstances.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between the Participating Member States and the scope of any such tax is uncertain. It may therefore be altered prior to any implementation. Additional EU Member States may decide to participate.

If the FTT proposal would be implemented in such a way that it will apply to certain dealings in Notes, it may have a material adverse effect on the Issuer, investors and their financial position. Investors should consult their professional advisors on the developments relating to the FTT and its applicability to the Notes once implemented.

Potential Conflicts of Interest

Potential conflicts of interest may exist between the Issuer, the Calculation Agent and the Noteholders, including (but not limited to) with respect to certain determinations and judgements that the Calculation Agent may make pursuant to the Conditions that may influence any interest amount due on, and for the amount receivable upon redemption of, the Notes.

The Issuer and its affiliates may engage in trading activities (including hedging activities) related to any Notes and any other instruments or derivative products for their proprietary accounts or for other accounts under their management. The Issuer and its affiliates may also issue other derivative instruments in respect of or related to any Notes. The Issuer and its affiliates may carry out activities that minimise its and/or their risks related to the Notes, including effecting transactions for their own account or for the account of their customers.

Risks related to the holding of the Notes

Because the Global Notes are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer

The Notes which are in NGN form (as specified in the applicable Final Terms), will be held by a common safekeeper for Euroclear and/or Clearstream, Luxembourg and the Notes which are not in NGN form (as specified in the applicable Final Terms) will initially be held by a common depositary for Euroclear and/or Clearstream, Luxembourg, or in either case by or on behalf of any other agreed clearing system, and in each case in the form of a Global Note which will be exchangeable for Definitive Notes only in the limited circumstances as more fully described in the relevant Global Note and in "*Summary of provisions relating to the Notes whilst in global form*" below. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the Global Notes. While the Notes are represented by the Global Notes, investors will be able to trade their beneficial interests only through Euroclear and Clearstream, Luxembourg.

The Issuer will discharge its payment obligations under the Notes by making payments to the common safekeeper or common depositary for Euroclear and Clearstream, Luxembourg for distribution to their account holders. A holder of a beneficial interest in a Global Note must rely on the procedures of Euroclear and Clearstream, Luxembourg to receive payments under the Notes. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the Global Notes. Accordingly, investors will be exposed to the credit risk of, and default risk in respect of, the relevant common safekeeper, common depositary and clearing systems.

Notes in NGN form

Notes may be issued in NGN form, and with the intention that they be deposited as eligible collateral in respect of monetary policy of the central banking system for the Euro (the "**Eurosystem**") and intra-day credit operations by the Eurosystem with one of the international central securities depositories and/or central securities depositories that fulfil the minimum standard as common safekeeper required for such institutions by the European Central Bank. This form of Notes and intention do not, however, necessarily mean that each Note in NGN form will be recognised as such eligible collateral, either upon issuance or at any or all times during their existence. Such recognition will depend upon satisfaction of all Eurosystem eligibility criteria at the relevant time and there can be no assurance that such Notes will be so recognised. Notes which do not qualify as eligible collateral for Eurosystem purposes may be of less value to investors than those which do.

Minimum Denomination

The Notes have a minimum denomination of EUR 100,000. The Conditions provide that, for so long as the Notes are represented by a Global Note and Euroclear and Clearstream, Luxembourg (or other relevant clearing system) so permit, the Notes will be tradable in nominal amounts (a) equal to, or integral multiples

of, the minimum denomination, and (b) the minimum denomination plus integral multiples of an amount lower than the minimum denomination.

Definitive Notes will only be issued if (a) Euroclear or Clearstream, Luxembourg (or other relevant clearing system) is closed for business for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention permanently to cease business or (b) any of the circumstances described in Condition 12 (*Events of Default*) occurs. If Definitive Notes are issued, such Notes will be issued in respect of all holdings of Notes equal to or greater than the minimum denomination. However, Noteholders should be aware that Definitive Notes that have a denomination that is not an integral multiple of the minimum denomination may be illiquid and difficult to trade. Definitive Notes will in no circumstances be issued to any person holding Notes in an amount lower than the minimum denomination. Any remaining principal amount of such Notes will be cancelled and holders will have no rights against the Issuer (including rights to receive principal or interest or to vote) in respect of such Notes.

Settlement Risk

Settlement of the Notes is subject to all applicable laws, regulations and practices in force at the relevant time and neither the Issuer nor any Paying Agent shall incur any liability whatsoever if it is unable to effect the transactions contemplated as a result of any such laws, regulations or practices. Neither the Issuer nor any Paying Agent shall under any circumstances be liable for any acts or defaults of any clearing system in relation to the performance of its duties in relation to the Notes.

The return on an investment in Notes will be affected by charges incurred by investors

An investor's total return on an investment in any Notes will be affected by the level of fees charged by the nominee service provider and/or relevant clearing systems used by the investor. Such a person or institution may charge fees for the opening and operation of an investment account, transfers of Notes, custody services and on payments of interest, principal and other amounts. Potential investors are therefore advised to investigate the basis on which any such fees will be charged on the relevant Notes.

Risks related to the admission of the Notes to trading on a regulated market

There is no active trading market for the Notes

The Notes are new securities which may not be widely distributed and for which there is currently no active trading market. If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Issuer. Although application has been made for the Notes to be admitted to listing on Euronext, there is no assurance that such application will be accepted or that an active trading market will develop. Accordingly, there is no assurance as to the development or liquidity of any trading market for the Notes.

Risks related to the market generally

Credit ratings may not reflect all risks

One or more independent credit rating agencies may assign credit ratings to the Notes. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

There is no assurance that a rating will remain for any given period of time or that a rating will not be lowered or withdrawn by the relevant rating agency if, in its judgement, circumstances in the future so warrant. Any adverse change in an applicable credit rating could adversely affect the trading price for the Notes issued under the Programme. In the event that a rating assigned to the Notes or the Issuer is subsequently lowered for any reason, no person or entity is obliged to provide any additional support or credit enhancement with respect to the Notes and the market value of the Notes is likely to be adversely affected.

In general, European regulated investors are restricted under the CRA Regulation from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the CRA Regulation (and such registration has not been withdrawn or suspended), subject

to transitional provisions that apply in certain circumstances whilst the registration application is pending. Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended). The list of registered and certified rating agencies published by the European Securities and Markets Authority ("**ESMA**") on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list. Certain information with respect to the credit rating agencies and ratings will be disclosed in the Final Terms.

CERTAIN NOTICES TO INVESTORS

Programme limit

The maximum aggregate principal amount of Notes outstanding at any one time under the Programme will not exceed EUR 3,000,000,000 and for this purpose, any Notes denominated in another currency shall be translated into euro at the date of the agreement to issue such Notes (calculated in accordance with the provisions of the Dealer Agreement). The maximum aggregate principal amount of Notes which may be outstanding at any one time under the Programme may be increased from time to time, subject to compliance with the relevant provisions of the Dealer Agreement as defined under "*Subscription and Sale*".

Ratings

Tranches of Notes issued under the Programme will be rated or unrated. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the rating(s) assigned to Notes already issued. Where a Tranche of Notes is rated, the applicable rating(s) will be specified in the relevant Final Terms. Whether or not each credit rating applied for in relation to a relevant Tranche of Notes will be (1) issued by a credit rating agency established in the EEA and registered under the Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "**CRA Regulation**"), or (2) issued by a credit rating agency which is not established in the EEA but will be endorsed by a credit rating agency which is established in the EEA and registered under the CRA Regulation or (3) issued by a credit rating agency which is not established in the EEA but which is certified under the CRA Regulation will be disclosed in the Final Terms.

In connection with the issue of any Tranche of Notes, the Dealer or Dealers (if any) named as the Stabilising Manager(s) (or persons acting on behalf of any Stabilising Manager(s)) in the applicable Final Terms may over allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilisation action or over-allotment must be conducted by the relevant Stabilising Manager(s) (or person(s) acting on behalf of any Stabilising Manager(s)) in accordance with all applicable laws and rules.

The Notes may not be a suitable investment for all investors

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Base Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial advisor) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisors to determine whether and to what extent (1) Notes are legal investments for it, (2) Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisors or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

FINAL TERMS

In this section the expression "necessary information" means, in relation to any Tranche of Notes, the information necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuer and of the rights attaching to the Notes. In relation to the different types of Notes which may be issued under the Programme the Issuer has included in this Base Prospectus all of the necessary information except for information relating to the Notes which is not known at the date of this Base Prospectus and which can only be determined at the time of an individual issue of a Tranche of Notes.

Any information relating to the Notes which is not included in this Base Prospectus and which is required in order to complete the necessary information in relation to a Tranche of Notes will be contained in the relevant Final Terms.

For a Tranche of Notes which is the subject of Final Terms, those Final Terms will, for the purposes of that Tranche only, supplement this Base Prospectus and must be read in conjunction with this Base Prospectus. The terms and conditions applicable to any particular Tranche of Notes which is the subject of Final Terms are the Conditions described in the relevant Final Terms as supplemented to the extent described in the relevant Final Terms.

Tranches of Notes issued under the Programme will be rated or unrated. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the rating(s) assigned to Notes already issued. Where a Tranche of Notes is rated, the applicable rating(s) will be specified in the relevant Final Terms. Whether or not each credit rating applied for in relation to a relevant Tranche of Notes will be (1) issued by a credit rating agency established in the EEA and registered under the Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "**CRA Regulation**"), or (2) issued by a credit rating agency which is not established in the EEA but will be endorsed by a credit rating agency which is established in the EEA and registered under the CRA Regulation or (3) issued by a credit rating agency which is not established in the EEA but which is certified under the CRA Regulation will be disclosed in the Final Terms.

In connection with the issue of any Tranche of Notes, the Dealer or Dealers (if any) named as the Stabilising Manager(s) (or persons acting on behalf of any Stabilising Manager(s)) in the applicable Final Terms may over allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilisation action or over-allotment must be conducted by the relevant Stabilising Manager(s) (or person(s) acting on behalf of any Stabilising Manager(s)) in accordance with all applicable laws and rules.

FORMS OF THE NOTES

Each Tranche of Notes will initially be in the form of either a temporary global note (the "**Temporary Global Note**"), without interest coupons, or a permanent global note (the "**Permanent Global Note**"), without interest coupons, in each case as specified in the relevant Final Terms. Each Temporary Global Note or, as the case may be, Permanent Global Note (each a "**Global Note**") which is not intended to be issued in new global note ("**NGN**") form, as specified in the relevant Final Terms, will be deposited on or around the issue date of the relevant Tranche of the Notes with a depository or a common depository for Euroclear Bank SA/NV as operator of the Euroclear System ("**Euroclear**") and/or Clearstream Banking, S.A. ("**Clearstream, Luxembourg**") and/or any other relevant clearing system (each a "**Relevant Clearing System**") and each Global Note which is intended to be issued in NGN form, as specified in the relevant Final Terms, will be deposited on or around the issue date of the relevant Tranche of the Notes with a common safekeeper for Euroclear and/or Clearstream, Luxembourg.

On 13 June 2006 the European Central Bank (the "**ECB**") announced that Notes in NGN form are in compliance with the "Standards for the use of EU securities settlement systems in ESCB credit operations" of the central banking system for the Euro (the "**Eurosystem**"), **provided that** certain other criteria are fulfilled. At the same time the ECB also announced that arrangements for Notes in NGN form will be offered by Euroclear and Clearstream, Luxembourg as of 30 June 2006 and that debt securities in global bearer form issued through Euroclear and Clearstream, Luxembourg after 31 December 2006 will only be eligible as collateral for Eurosystem operations if the NGN form is used.

The relevant Final Terms will also specify whether United States Treasury Regulation §1.163-5(c)(2)(i)(C) (the "**TEFRA C Rules**") or United States Treasury Regulation §1.163-5(c)(2)(i)(D) (the "**TEFRA D Rules**") are applicable in relation to the Notes or, if the Notes do not have a maturity of more than one year, that neither the TEFRA C Rules nor the TEFRA D Rules are applicable.

Temporary Global Note exchangeable for Permanent Global Notes

If the relevant Final Terms specifies the form of Notes as being "Temporary Global Note exchangeable for a Permanent Global Note", then the Notes will initially be in the form of a Temporary Global Note which will be exchangeable, in whole or in part, for interests in a Permanent Global Note, without interest coupons, not earlier than 40 days after the issue date of the relevant Tranche of the Notes upon certification as to non-U.S. beneficial ownership. No payments will be made under the Temporary Global Note unless exchange for interests in the Permanent Global Note is improperly withheld or refused. In addition, interest payments in respect of the Notes cannot be collected without such certification of non-U.S. beneficial ownership.

Whenever any interest in the Temporary Global Note is to be exchanged for an interest in a Permanent Global Note, the Issuer shall procure (in the case of first exchange) the delivery of a Permanent Global Note to the bearer of the Temporary Global Note or (in the case of any subsequent exchange) an increase in the principal amount of the Permanent Global Note in accordance with its terms against:

- (i) presentation and (in the case of final exchange) presentation and surrender of the Temporary Global Note to or to the order of the Principal Paying Agent; and
- (ii) receipt by the Principal Paying Agent of a certificate or certificates of non-U.S. beneficial ownership.

The principal amount of Notes represented by the Permanent Global Note shall be equal to the aggregate of the principal amounts specified in the certificates of non-U.S. beneficial ownership **provided, however, that** in no circumstances shall the principal amount of Notes represented by the Permanent Global Note exceed the initial principal amount of Notes represented by the Temporary Global Note.

If:

- (a) the Permanent Global Note has not been delivered or the principal amount thereof increased by 5.00 p.m. (Amsterdam time) on the seventh day after the bearer of the Temporary Global Note has requested exchange of an interest in the Temporary Global Note for an interest in a Permanent Global Note; or

- (b) the Temporary Global Note (or any part thereof) has become due and payable in accordance with the Terms and Conditions of the Notes or the date for final redemption of the Temporary Global Note has occurred and, in either case, payment in full of the amount of principal falling due with all accrued interest thereon has not been made to the bearer of the Temporary Global Note in accordance with the terms of the Temporary Global Note on the due date for payment,

then at 5.00 p.m. (Amsterdam time) on such seventh day (in the case of (a) above) or at 5.00 p.m. (Amsterdam time) on such due date (in the case of (b) above) (the "**Relevant Time**") each Relevant Account Holder shall directly acquire, without the need for any further action on behalf of any person, against the Issuer all those rights ("**Direct Rights**") which such Relevant Account Holder would have had if, immediately before the Relevant Time, it held and owned duly executed and authenticated Definitive Notes and (if applicable) Coupons, Coupon sheets and/or Talons in respect of each Note represented by such Temporary Global Note which such Relevant Account Holder has credited to its securities account with the Relevant Clearing System at the Relevant Time including, without limitation, the right to receive all payments due at any time in respect of such Definitive Notes other than any corresponding payments already made under such Temporary Global Note, and the bearer of such Temporary Global Note will have no further rights thereunder.

The Permanent Global Note will become exchangeable, in whole but not in part only and at the request of the bearer of the Permanent Global Note, for Bearer Notes in definitive form (each a "**Definitive Note**"):

- (a) on the expiry of such period of notice as may be specified in the Final Terms; or
- (b) at any time, if so specified in the Final Terms; or
- (c) if the Final Terms specifies "*in the limited circumstances described in the Permanent Global Note*", then if either of the following events occurs:
 - (i) Euroclear or Clearstream, Luxembourg, or any other relevant clearing system is closed for business for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention permanently to cease business; or
 - (ii) any of the circumstances described in Condition 12 (*Events of Default*) occurs.

Whenever the Permanent Global Note is to be exchanged for Definitive Notes, the Issuer shall procure the prompt delivery (free of charge to the bearer) of such Definitive Notes, duly authenticated and with Coupons and Talons attached (if so specified in the Final Terms), in an aggregate principal amount equal to the principal amount of Notes represented by the Permanent Global Note to the bearer of the Permanent Global Note against the surrender of the Permanent Global Note to or to the order of the Principal Paying Agent within 30 days of the bearer requesting such exchange.

If:

- (a) Definitive Notes have not been duly delivered by 5.00 p.m. (Amsterdam time) on the thirtieth day after the bearer has requested exchange of the Permanent Global Note for Definitive Notes; or
- (b) the Permanent Global Note was originally issued in exchange for part only of a Temporary Global Note representing the Notes and Relevant Accountholders obtained Direct Rights as defined in such Temporary Global Note in accordance with its terms; or
- (c) the Permanent Global Note (or any part thereof) has become due and payable in accordance with the Terms and Conditions of the Notes or the date for final redemption of the Permanent Global Note has occurred and, in either case, payment in full of the amount of principal falling due with all accrued interest thereon has not been made to the bearer in accordance with the terms of the Permanent Global Note on the due date for payment,

then at 5.00 p.m. (Amsterdam time) on such thirtieth day (in the case (a) above) or at 5.00 p.m. (Amsterdam time) on the date such Temporary Global Note becomes void (in the case of (b) above) or at 5.00 p.m. (Amsterdam time) on such due date (in the case of (c) above) (the "**Relevant Time**") each Relevant Account Holder shall directly acquire, without the need for any further action on behalf of any person, against the Issuer all those rights ("**Direct Rights**") which such Relevant Account Holder would have had if,

immediately before the Relevant Time, it held and owned duly executed and authenticated Definitive Notes and (if applicable) Coupons, Coupon sheets and/or Talons in respect of each Note represented by such Permanent Global Note which such Relevant Account Holder has credited to its securities account with the Relevant Clearing System at the Relevant Time including, without limitation, the right to receive all payments due at any time in respect of such Definitive Notes other than any corresponding payments already made under such Permanent Global Note, and the bearer of such Permanent Global Note will have no further rights thereunder.

Temporary Global Note exchangeable for Definitive Notes

If the relevant Final Terms specifies the form of Notes as being "*Temporary Global Note exchangeable for Definitive Notes*" and also specifies that the TEFRA C Rules are applicable or that neither the TEFRA C Rules or the TEFRA D Rules are applicable, then the Notes will initially be in the form of a Temporary Global Note which will be exchangeable, in whole but not in part, for Definitive Notes not earlier than 40 days after the issue date of the relevant Tranche of the Notes.

If the relevant Final Terms specifies the form of Notes as being "*Temporary Global Note exchangeable for Definitive Notes*" and also specifies that the TEFRA D Rules are applicable, then the Notes will initially be in the form of a Temporary Global Note which will be exchangeable, in whole or in part, for Definitive Notes not earlier than 40 days after the issue date of the relevant Tranche of the Notes upon certification as to non-U.S. beneficial ownership. Interest payments in respect of the Notes cannot be collected without such certification of non-U.S. beneficial ownership.

Whenever the Temporary Global Note is to be exchanged for Definitive Notes, the Issuer shall procure the prompt delivery (free of charge to the bearer) of such Definitive Notes, duly authenticated and with Coupons and Talons attached (if so specified in the relevant Final Terms), in an aggregate principal amount equal to the principal amount of the Temporary Global Note to the bearer of the Temporary Global Note against the surrender of the Temporary Global Note to or to the order of the Principal Paying Agent within 30 days of the bearer requesting such exchange.

If:

- (a) Definitive Notes have not been duly delivered by 5.00 p.m. (Amsterdam time) on the thirtieth day after the bearer has requested exchange of the Temporary Global Note for Definitive Notes; or
- (b) the Temporary Global Note (or any part thereof) has become due and payable in accordance with the Terms and Conditions of the Notes or the date for final redemption of the Temporary Global Note has occurred and, in either case, payment in full of the amount of principal falling due with all accrued interest thereon has not been made to the bearer in accordance with the terms of the Temporary Global Note on the due date for payment,

then at 5.00 p.m. (Amsterdam time) on such thirtieth day (in the case of (a) above) or at 5.00 p.m. (Amsterdam time) on such due date (in the case of (b) above) (the "**Relevant Time**") each Relevant Account Holder shall directly acquire, without the need for any further action on behalf of any person, against the Issuer all those rights ("**Direct Rights**") which such Relevant Account Holder would have had if, immediately before the Relevant Time, it held and owned duly executed and authenticated Definitive Notes and (if applicable) Coupons, Coupon sheets and/or Talons in respect of each Note represented by such Temporary Global Note which such Relevant Account Holder has credited to its securities account with the Relevant Clearing System at the Relevant Time including, without limitation, the right to receive all payments due at any time in respect of such Definitive Notes other than any corresponding payments already made under such Temporary Global Note, and the bearer of such Temporary Global Note will have no further rights thereunder.

Permanent Global Note exchangeable for Definitive Notes

If the relevant Final Terms specifies the form of Notes as being "*Permanent Global Note exchangeable for Definitive Notes*", then the Notes will initially be in the form of a Permanent Global Note which will be exchangeable in whole, but not in part, for Definitive Notes:

- (a) on the expiry of such period of notice as may be specified in the relevant Final Terms; or
- (b) at any time, if so specified in the relevant Final Terms; or

- (c) if the relevant Final Terms specifies "*in the limited circumstances described in the Permanent Global Note*", then if either of the following events occurs:
- (i) Euroclear or Clearstream, Luxembourg or any other relevant clearing system is closed for business for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention permanently to cease business; or
 - (ii) any of the circumstances described in Condition 12 (*Events of Default*) occurs.

Whenever the Permanent Global Note is to be exchanged for Definitive Notes, the Issuer shall procure the prompt delivery (free of charge to the bearer) of such Definitive Notes, duly authenticated and with Coupons and Talons attached (if so specified in the Final Terms), in an aggregate principal amount equal to the principal amount of Notes represented by the Permanent Global Note to the bearer of the Permanent Global Note against the surrender of the Permanent Global Note to or to the order of the Principal Paying Agent within 30 days of the bearer requesting such exchange.

If:

- (a) Definitive Notes have not been duly delivered by 5.00 p.m. (Amsterdam time) on the thirtieth day after the bearer has requested exchange of the Permanent Global Note for Definitive Notes; or
- (b) the Permanent Global Note (or any part thereof) has become due and payable in accordance with the Terms and Conditions of the Notes or the date for final redemption of the Permanent Global Note has occurred and, in either case, payment in full of the amount of principal falling due with all accrued interest thereon has not been made to the bearer in accordance with the terms of the Permanent Global Note on the due date for payment,

then at 5.00 p.m. (Amsterdam time) on such thirtieth day (in the case of (a) above) or at 5.00 p.m. (Amsterdam time) on such due date (in the case of (b) above) (the "**Relevant Time**") each Relevant Account Holder shall directly acquire, without the need for any further action on behalf of any person, against the Issuer all those rights ("**Direct Rights**") which such Relevant Account Holder would have had if, immediately before the Relevant Time, it held and owned duly executed and authenticated Definitive Notes and (if applicable) Coupons, Coupon sheets and/or Talons in respect of each Note represented by such Permanent Global Note which such Relevant Account Holder has credited to its securities account with the Relevant Clearing System at the Relevant Time including, without limitation, the right to receive all payments due at any time in respect of such Definitive Notes other than any corresponding payments already made under such Permanent Global Note, and the bearer of such Permanent Global Note will have no further rights thereunder.

For the purposes of this section "*Form of the Notes*", "**Relevant Account Holder**" means any account holder with a Relevant Clearing Systems which at the Relevant Time has credited to its securities account with such Relevant Clearing System Notes represented by a Global Note or any relevant part of it.

The terms and conditions applicable to any Note in global form will differ from those terms and conditions which would apply to the Note were it in definitive form to the extent described under "*Summary of Provisions Relating to the Notes while in Global Form*" below.

The terms and conditions applicable to any Note in global form will differ from those terms and conditions which would apply to the Note were it in definitive form to the extent described under "Summary of Provisions Relating to the Notes while in Global Form" below.

1. Introduction

- (a) **Programme:** Stedin Holding N.V. (the "**Issuer**") has established a Euro Medium Term Note Programme (the "**Programme**") for the issuance of up to EUR 3,000,000,000 in aggregate principal amount of notes (the "**Notes**").
- (b) **Final Terms:** Notes issued under the Programme are issued in series (each a "**Series**") and each Series may comprise one or more tranches (each a "**Tranche**") of Notes. Each Tranche is the subject of final terms (the "**Final Terms**") which supplements these terms and conditions (the "**Conditions**"). The terms and conditions applicable to any particular Tranche of Notes are these Conditions as supplemented by the relevant Final Terms. In the event of any inconsistency between these Conditions and the relevant Final Terms, the relevant Final Terms shall prevail.
- (c) **Agency Agreement:** The Notes are the subject of an agency agreement dated 1 November 2019 (the "**Agency Agreement**") between the Issuer, ABN AMRO Bank N.V. as principal paying agent (the "**Principal Paying Agent**", which expression includes any successor principal paying agent appointed from time to time in connection with the Notes) and the paying agents named therein (together with the Principal Paying Agent, the "**Paying Agents**", which expression includes any successor or additional paying agents appointed from time to time in connection with the Notes).
- (d) **The Notes:** All subsequent references in these Conditions to "Notes" are to the Notes which are the subject of the relevant Final Terms. Copies of the relevant Final Terms are available for viewing at the Issuer's head office, Blaak 8, 3011 TA Rotterdam, The Netherlands and will be published in electronic form on <https://www.stedingroep.nl/investor-relations>.
- (e) **Summaries:** Certain provisions of these Conditions are summaries of the Agency Agreement and are subject to their detailed provisions. The holders of the Notes (the "**Noteholders**") and the holders of the related interest coupons, if any, (the "**Couponholders**" and the "**Coupons**", respectively) are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement applicable to them. Copies of the Agency Agreement are available for inspection by Noteholders during normal business hours at the Specified Offices of each of the Paying Agents, the initial Specified Offices of which are set out below.

- (ii) if Linear Interpolation is specified as applicable in respect of an Interest Period in the applicable Final Terms, the Rate of Interest for such Interest Period shall be calculated by the Calculation Agent by straight-line linear interpolation by reference to two rates which appear on the Relevant Screen Page as of the Relevant Time on the relevant Interest Determination Date, where:
 - (A) one rate shall be determined as if the relevant Interest Period were the period of time for which rates are available next shorter than the length of the relevant Interest Period; and

provided, however, that if no rate is available for a period of time next shorter or, as the case may be, next longer than the length of the relevant Interest Period, then the Calculation Agent shall determine such rate at such time and by reference to such sources as it determines appropriate;

- (iv) if, in the case of (i) above, such rate does not appear on that page or, in the case of (iii) above, fewer than two such rates appear on that page or if, in either case, the Relevant Screen Page is unavailable, the Calculation Agent will:
 - (A) request the principal Relevant Financial Centre office of each of the Reference Banks to provide a quotation of the Reference Rate at approximately the Relevant Time on the Interest Determination Date to prime banks in the Relevant Financial Centre interbank market in an amount that is representative for a single transaction in that market at that time; and
 - (B) determine the arithmetic mean of such quotations; and
- (v) if fewer than two such quotations are provided as requested, the Calculation Agent will determine the arithmetic mean of the rates (being the nearest to the Reference Rate, as determined by the Calculation Agent) quoted by major banks in the Principal Financial Centre of the Specified Currency, selected by the Calculation Agent, at approximately 11.00 a.m. (local time in the Principal Financial Centre of the Specified Currency) on the first day of the relevant Interest Period for loans in the Specified Currency to leading European banks for a period equal to the relevant Interest Period and in an amount that is representative for a single transaction in that market at that time,

and the Rate of Interest for such Interest Period shall be the sum of the Margin and the rate or (as the case may be) the arithmetic mean so determined; **provided, however, that** if the Calculation Agent is unable to determine a rate or (as the case may be) an arithmetic mean in accordance with the above provisions in relation to any Interest Period, the Rate of Interest applicable to the Notes during such Interest Period will be the sum of the Margin and the rate or (as the case may be) the arithmetic mean last determined in relation to the Notes in respect of a preceding Interest Period.

- (d) **ISDA Determination:** If ISDA Determination is specified in the relevant Final Terms as the manner in which the Rate(s) of Interest is/are to be determined, the Rate of Interest applicable to the Notes for each Interest Period will be the sum of the Margin and the

relevant ISDA Rate where "**ISDA Rate**" in relation to any Interest Period means a rate equal to the Floating Rate (as defined in the relevant ISDA Definitions) that would be determined by the Calculation Agent under an interest rate swap transaction if the Calculation Agent were acting as Calculation Agent for that interest rate swap transaction under the terms of an agreement incorporating the relevant ISDA Definitions and under which:

- (i) the Floating Rate Option (as defined in the relevant ISDA Definitions) is as specified in the relevant Final Terms;
- (ii) the Designated Maturity (as defined in the relevant ISDA Definitions) is a period specified in the relevant Final Terms;
- (iii) the relevant Reset Date (as defined in the relevant ISDA Definitions) is either (A) if the relevant Floating Rate Option is based on the London inter-bank offered rate (LIBOR) for a currency, the first day of that Interest Period or (B) in any other case, as specified in the relevant Final Terms; and
- (iv) if Linear Interpolation is specified as applicable in respect of an Interest Period in the applicable Final Terms, the Rate of Interest for such Interest Period shall be calculated by the Calculation Agent by straight-line linear interpolation by reference to two rates based on the relevant Floating Rate Option, where:
 - (A) one rate shall be determined as if the Designated Maturity were the period of time for which rates are available next shorter than the length of the relevant Interest Period; and
 - (B) the other rate shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period

provided, however, that if there is no rate available for a period of time next shorter than the length of the relevant Interest Period or, as the case may be, next longer than the length of the relevant Interest Period, then the Calculation Agent shall determine such rate at such time and by reference to such sources as it determines appropriate.

- (e) **Maximum or Minimum Rate of Interest:** If any Maximum Rate of Interest or Minimum Rate of Interest is specified in the relevant Final Terms, then the Rate of Interest shall in no event be greater than the maximum or be less than the minimum so specified (which may not be less than zero) or if no such rate is stated the Minimum Rate of Interest shall be deemed zero.
- (f) **Calculation of Interest Amount:** The Calculation Agent will, as soon as practicable after the time at which the Rate of Interest is to be determined in relation to each Interest Period, calculate the Interest Amount payable in respect of each Note for such Interest Period. The Interest Amount will be calculated by applying the Rate of Interest for such Interest Period to the Calculation Amount, multiplying the product by the relevant Day Count Fraction, rounding the resulting figure to the nearest sub-unit of the Specified Currency (half a sub-unit being rounded upwards) and multiplying such rounded figure by a fraction equal to the Specified Denomination of the relevant Note divided by the Calculation Amount. For this purpose a "**sub-unit**" means, in the case of any currency other than euro, the lowest amount of such currency that is available as legal tender in the country of such currency and, in the case of euro, means one cent.
- (g) **Calculation of other amounts:** If the relevant Final Terms specifies that any other amount is to be calculated by the Calculation Agent, the Calculation Agent will, as soon as practicable after the time or times at which any such amount is to be determined, calculate the relevant amount. The relevant amount will be calculated by the Calculation Agent in the manner specified in the relevant Final Terms.
- (h) **Publication:** The Calculation Agent will cause each Rate of Interest and Interest Amount determined by it, together with the relevant Interest Payment Date, and any other amount(s)

required to be determined by it together with any relevant payment date(s) to be notified to the Paying Agents and each competent authority, stock exchange and/or quotation system (if any) by which the Notes have then been admitted to listing, trading and/or quotation as soon as practicable after such determination but (in the case of each Rate of Interest, Interest Amount and Interest Payment Date) in any event not later than the first day of the relevant Interest Period. Notice thereof shall also promptly be given to the Noteholders. The Calculation Agent will be entitled to recalculate any Interest Amount (on the basis of the foregoing provisions) without notice in the event of an extension or shortening of the relevant Interest Period. If the Calculation Amount is less than the minimum Specified Denomination the Calculation Agent shall not be obliged to publish each Interest Amount but instead may publish only the Calculation Amount and the Interest Amount in respect of a Note having the minimum Specified Denomination.

- (i) **Notifications etc:** All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition by the Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Paying Agents, the Noteholders and the Couponholders and (subject as aforesaid) no liability to any such Person will attach to the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.
- (j) **Benchmark Discontinuation:** If a Benchmark Event occurs in relation to the Reference Rate when the Rate of Interest (or any component part thereof) for any Interest Period remains to be determined by reference to such Reference Rate, then the Issuer shall use its reasonable endeavours to appoint an Independent Advisor, as soon as reasonably practicable, to determine a Successor Rate, failing which an Alternative Rate (in accordance with Condition 7(j)) and, in either case, an Adjustment Spread, if any (in accordance with Condition 7(j)(cc)) and any Benchmark Amendments (in accordance with Condition 7(j)(dd)).

In the absence of bad faith or fraud, the Independent Advisor shall have no liability whatsoever to the Issuer, the Paying Agents or the Noteholders for any determination made by it pursuant to this Condition 7(j).

- (aa) If (i) the Issuer is unable to appoint an Independent Advisor or (ii) the Independent Advisor appointed by it fails to determine a Successor Rate or, failing which, an Alternative Rate in accordance with this Condition 7(j) prior to the relevant Interest Determination Date, the Reference Rate applicable to the immediate following Interest Period shall be the Reference Rate applicable as at the last preceding Interest Determination Date. If there has not been a first Interest Payment Date, the Reference Rate shall be the Reference Rate applicable to the first Interest Period. For the avoidance of doubt, any adjustment pursuant to this final paragraph of Condition 7(j) shall apply to the immediately following Interest Period only. Any subsequent Interest Period may be subject to the subsequent operation of this Condition 7(j).
- (bb) If the Independent Advisor determines in its discretion that:
 - (A) there is a Successor Rate, then such Successor Rate shall (subject to adjustment as provided in Condition 7(j)(cc)) subsequently be used in place of the Reference Rate to determine the Rate of Interest for the immediately following Interest Period and all following Interest Periods, subject to the subsequent operation of this Condition 7(j); or
 - (B) there is no Successor Rate but that there is an Alternative Rate, then such Alternative Rate shall (subject to adjustment as provided in Condition 7(j)(cc)) subsequently be used in place of the Reference Rate to determine the Rate of Interest for the immediately following Interest Period and all following Interest Periods, subject to the subsequent operation of this Condition 7(j).

- (cc) If the Independent Advisor determines in its discretion (A) that an Adjustment Spread is required to be applied to the Successor Rate or the Alternative Rate (as the case may be) and (B) the quantum of, or a formula or methodology for determining, such Adjustment Spread, then such Adjustment Spread shall apply to the Successor Rate or the Alternative Rate (as the case may be).
- (dd) If any relevant Successor Rate, Alternative Rate or Adjustment Spread is determined in accordance with this Condition 7(j) and the Independent Advisor determines in its discretion (i) that amendments to these Conditions are necessary to ensure the proper operation of such Successor Rate, Alternative Rate and/or Adjustment Spread (such amendments, the "**Benchmark Amendments**") and (ii) the terms of the Benchmark Amendments, then the Issuer shall, following consultation with the Calculation Agent (or the person specified in the applicable Final Terms as the party responsible for calculating the Rate of Interest and the Interest Amount(s)), subject to giving notice thereof in accordance with Condition 7(j)(ee), without any requirement for the consent or approval of relevant Noteholders, vary these Conditions to give effect to such Benchmark Amendments with effect from the date specified in such notice (and for the avoidance of doubt, the Principal Paying Agent shall, at the direction and expense of the Issuer, consent to and effect such consequential amendments to the Agency Agreement and these Conditions as may be required in order to give effect to this Condition 7(j)).
- (ee) Any Successor Rate, Alternative Rate, Adjustment Spread and the specific terms of any Benchmark Amendments, determined under this Condition 7(j) will be notified promptly by the Issuer to the Principal Paying Agent, the Calculation Agent, the Paying Agents and, in accordance with Condition 18 (*Notices*), the Noteholders. Such notice shall be irrevocable and shall specify the effective date of the Benchmark Amendments, if any.
- (ff) No later than notifying the Principal Paying Agent of the same, the Issuer shall deliver to the Principal Paying Agent a certificate signed by two authorised signatories of the Issuer:
 - (A) confirming (x) that a Benchmark Event has occurred, (y) the relevant Successor Rate, or, as the case may be, the relevant Alternative Rate and, (z) where applicable, any relevant Adjustment Spread and/or the specific terms of any relevant Benchmark Amendments, in each case as determined in accordance with the provisions of this Condition 7(j); and
 - (B) certifying that the relevant Benchmark Amendments are necessary to ensure the proper operation of such relevant Successor Rate, Alternative Rate and/or Adjustment Spread.
- (gg) The Successor Rate or Alternative Rate and the Adjustment Spread (if any) and the Benchmark Amendments (if any) specified in such certificate will (in the absence of manifest error or bad faith in the determination of such Successor Rate or Alternative Rate and such Adjustment Spread (if any) and such Benchmark Amendments (if any)) be binding on the Issuer, the Principal Paying Agent, the Calculation Agent, the other Paying Agents and the Noteholders.
- (hh) As used in this Condition 7(j):

"Adjustment Spread" means either a spread (which may be positive or negative), or the formula or methodology for calculating a spread, in either case, which the Independent Advisor determines is required to be applied to the relevant Successor Rate or the relevant Alternative Rate (as the case may be) to reduce or eliminate, to the extent reasonably practicable in the circumstances, any economic prejudice or benefit (as the case may be) to Noteholders as a result of the replacement of the Reference Rate with the Successor Rate or the Alternative Rate (as the case may be) and is the spread, formula or methodology which:

- (A) in the case of a Successor Rate, is formally recommended, or formally provided as an option for parties to adopt, in relation to the replacement of the Reference Rate with the Successor Rate by any Relevant Nominating Body; or
- (B) (if no such recommendation has been made, or in the case of an Alternative Rate), the Independent Advisor, determines is customarily applied to the relevant Successor Rate or Alternative Rate (as the case may be) in international debt capital markets transactions to produce an industry-accepted replacement rate for the Reference Rate; or
- (C) (if no such recommendation has been made, or in the case of an Alternative Rate) the Independent Advisor determines, is recognised or acknowledged as being the industry standard for over-the-counter derivative transactions which reference the Reference Rate, where such rate has been replaced by the Successor Rate or the Alternative Rate (as the case may be); or
- (D) (if the Independent Advisor determines that no such industry standard is recognised or acknowledged) the Independent Advisor determines to be appropriate.

"Alternative Rate" means an alternative benchmark or screen rate which the Independent Advisor determines in accordance with Condition 7(j) is customary in market usage in the international debt capital markets for the purposes of determining floating rates of interest (or the relevant component part thereof) in the Specified Currency.

- (C) a public statement by the supervisor of the administrator of the relevant Reference Rate that such Reference Rate has been or will, by a specified date within the following six months, be permanently or indefinitely discontinued; or
- (D) a public statement by the supervisor of the administrator of the relevant Reference Rate that means that such Reference Rate will, by a specified date within the following six months, be prohibited from being used or that its use will be subject to restrictions or adverse consequences, either generally or in respect of the Notes; or
- (E) a public statement by the supervisor of the administrator of the relevant Reference Rate (as applicable) that, in the view of such supervisor, (i) such Reference Rate is no longer representative of an underlying market or (ii) the methodology to calculate such Reference Rate has materially changed; or
- (F) it has or will, by a specified date within the following six months, become unlawful for the Calculation Agent to calculate any payments due to be made to any Noteholder using the relevant Reference Rate (as applicable) (including, without limitation, under the Benchmark Regulation (EU) 2016/1011, if applicable).

- (b) **Late payment on Zero Coupon Notes:** If the Redemption Amount payable in respect of any Zero Coupon Note is improperly withheld or refused, the Redemption Amount shall thereafter be an amount equal to the sum of:
 - (i) the Reference Price; and
 - (ii) the product of the Accrual Yield (compounded annually) being applied to the Reference Price on the basis of the relevant Day Count Fraction from (and including) the Issue Date to (but excluding) whichever is the earlier of (i) the day on which all sums due in respect of such Note up to that day are received by or on behalf of the relevant Noteholder and (ii) the day which is seven days after the Principal Paying Agent has notified the Noteholders that it has received all sums due in respect of the Notes up to such seventh day (except to the extent that there is any subsequent default in payment).

- (B) such obligation cannot be avoided by the Issuer taking reasonable measures available to it,

provided, however, that no such notice of redemption shall be given earlier than:

- (B) *Issuer Refinancing Call:* If Issuer Refinancing Call is specified in the relevant Final Terms as being applicable, the Issuer may, having given:

The determination of any rate or amount, the obtaining of each quotation and the making of each determination or calculation by the Quotation Agent shall (in the absence of manifest error) be final and binding upon all parties.

The Paying Agent with which a Note is so deposited shall deliver a duly completed Put Option Receipt to the depositing Noteholder. No Note, once deposited with a duly completed Put Option Notice in accordance with this Condition 9(e), may be withdrawn; **provided, however, that** if, prior to the relevant Optional Redemption Date (Put), any such Note becomes immediately due and payable or, upon due presentation of any such Note on the relevant Optional Redemption Date (Put), payment of the redemption moneys is improperly withheld or refused, the relevant Paying Agent shall mail notification thereof to the depositing Noteholder at such address as may have been given by such Noteholder in the relevant Put Option Notice and shall hold such Note at its Specified Office for collection by the depositing Noteholder against surrender of the relevant Put Option Receipt. - (c) **Payments in New York City:** Payments of principal or interest may be made at the Specified Office of a Paying Agent in New York City if (i) the Issuer has appointed Paying Agents outside the United States with the reasonable expectation that such Paying Agents will be able to make payment of the full amount of the interest on the Notes in the currency in which the payment is due when due, (ii) payment of the full amount of such interest at the offices of all such Paying Agents is illegal or effectively precluded by exchange controls or other similar restrictions and (iii) payment is permitted by applicable United States law.

- (d) **Payments subject to fiscal laws:** All payments in respect of the Notes are subject in all cases to any applicable fiscal or other laws and regulations in the place of payment, but without prejudice to the provisions of Condition 11 (*Taxation*).  - (ii) if the aggregate amount of the missing Coupons is greater than the amount of principal due for payment:
 - (A) so many of such missing Coupons shall become void (in inverse order of maturity) as will result in the aggregate amount of the remainder of such missing Coupons (the "**Relevant Coupons**") being equal to the amount of principal due for payment; **provided, however, that** where this subparagraph would otherwise require a fraction of a missing Coupon to become void, such missing Coupon shall become void in its entirety; and
 - (B) a sum equal to the aggregate amount of the Relevant Coupons (or, if less, the amount of principal due for payment) will be deducted from the amount of principal due for payment; **provided, however, that**, if the gross amount available for payment is less than the amount of principal due for payment, the sum deducted will be that proportion of the aggregate amount of the Relevant Coupons (or, as the case may be, the amount of principal due for payment) which the gross amount actually available for payment bears to the amount of principal due for payment.
- Each sum of principal so deducted shall be paid in the manner provided in paragraph (a) above against presentation and (**provided that** payment is made in full) surrender of the relevant missing Coupons.
- (f) **Unmatured Coupons void:** If the relevant Final Terms specifies that this Condition 10(f) is applicable or that the Floating Rate Note Provisions are applicable, on the due date for final redemption of any Note or early redemption in whole of such Note pursuant to Condition 9(b) (*Redemption for tax reasons*), Condition 9(c) (A) (*Redemption at the option of the Issuer*), Condition 9(c) (B) (*Issuer Refinancing Call*), Condition 9(c) (C) (*Make-whole Redemption by the Issuer*), Condition 9(e) (*Redemption at the option of the Noteholders*) or Condition 12 (*Events of Default*), all unmatured Coupons relating thereto (whether or not still attached) shall become void and no payment will be made in respect thereof.
- (g) **Payments on business days:** If the due date for payment of any amount in respect of any Note or Coupon is not a Payment Business Day in the place of presentation, the holder shall not be entitled to payment in such place of the amount due until the next succeeding Payment Business Day in such place and shall not be entitled to any further interest or other payment in respect of any such delay.

In addition, a resolution in writing signed by or on behalf of all Noteholders who for the time being are entitled to receive notice of a meeting of Noteholders will take effect as if it were an Extraordinary Resolution. Such a resolution in writing may be contained in one document or several documents in the same form, each signed by or on behalf of one or more Noteholders.

- (b) **Modification:** The Notes and these Conditions may be amended without the consent of the Noteholders or the Couponholders to correct a manifest error, determined solely by the Issuer. In addition, the parties to the Agency Agreement may agree to modify any provision thereof, but the Issuer shall not agree, without the consent of the Noteholders, to any such modification unless it is of a formal, minor or technical nature, it is made to correct a manifest error or it is, in the opinion of the Issuer, not materially prejudicial to the interests of the Noteholders.

17. **Further Issues**

The Issuer may from time to time, without the consent of the Noteholders or the Couponholders, create and issue further notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes.

19. **Currency Indemnity**

This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

20. **Rounding**

For the purposes of any calculations referred to in these Conditions (unless otherwise specified in these Conditions or the relevant Final Terms), (a) all percentages resulting from such calculations will be rounded, if necessary, to the nearest one hundred-thousandth of a percentage point (with 0.000005 per cent. being rounded up to 0.00001 per cent.), (b) all United States dollar amounts used in or resulting from such calculations will be rounded to the nearest cent (with one half cent being rounded up), (c) all Japanese Yen amounts used in or resulting from such calculations will be rounded downwards to the next lower whole Japanese Yen amount, and (d) all amounts

This document constitutes the Final Terms of the Notes described herein for the purposes of Article 8.4 of the Prospectus Regulation. These Final Terms contain the final terms of the Notes and must be read in conjunction with such Base Prospectus [as so supplemented].

PROHIBITION OF SALES TO EEA RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or (ii) a customer within the meaning of Directive 2002/92/EC (as amended, the "**Insurance Mediation Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently no key information document required by Regulation (EU) No 1286/2014 (the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

[MiFID II product governance / Professional investors and ECPs only target market – Solely for the purposes of [the/each] manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the manufacturer['s/s'] target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer['s/s'] target market assessment) and determining appropriate distribution channels.]

[Include whichever of the following apply or specify as "Not Applicable" (N/A). Note that the numbering should remain as set out below, even if "Not Applicable" is indicated for individual paragraphs or subparagraphs. Italics denote guidance for completing the Final Terms.]

[When completing any final terms, consideration should be given as to whether such terms or information constitute "significant new factors" and consequently trigger the need for a supplement to the Base Prospectus under Article 23 of the Prospectus Regulation.]

SUMMARY OF PROVISIONS RELATING TO THE NOTES WHILE IN GLOBAL FORM

Clearing System Accountholders

Each Global Note will be in bearer form. Consequently, in relation to any Tranche of Notes represented by a Global Note, references in the Terms and Conditions of the Notes to "**Noteholder**" are references to the bearer of the relevant Global Note which, for so long as the Global Note is held by a depositary or a common depositary, in the case of a CGN, or a common safekeeper, in the case of an NGN for Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system, will be that depositary or common depositary or, as the case may be, common safekeeper.

Each of the persons shown in the records of Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system as being entitled to an interest in a Global Note (each an "**Accountholder**") must look solely to Euroclear and/or Clearstream, Luxembourg and/or such other relevant clearing system (as the case may be) for such Accountholder's share of each payment made by the Issuer to the bearer of such Global Note and in relation to all other rights arising under the Global Note. The extent to which, and the manner in which, Accountholders may exercise any rights arising under the Global Note will be determined by the respective rules and procedures of Euroclear and Clearstream, Luxembourg and any other relevant clearing system from time to time. For so long as the relevant Notes are represented by the Global Note, Accountholders shall have no claim directly against the Issuer in respect of payments due under the Notes and such obligations of the Issuer will be discharged by payment to the bearer of the Global Note.

In case of Notes which have a denomination consisting of the minimum Specified Denomination plus a higher integral multiple of another smaller amount, it is possible that the Notes may be traded in amounts in excess such minimum Specified Denomination that are not integral multiples of such minimum Specified Denomination. So long as such Notes are represented by a Temporary Global Note or Permanent Global Note and the relevant clearing system(s) so permit, these Notes will be tradable only in the minimum Specified Denomination increased with integral multiples of another smaller amount, notwithstanding that Definitive Notes shall only be issued up to, but excluding, twice the minimum Specified Denomination.

Conditions applicable to Global Notes

Each Global Note will contain provisions which modify the Terms and Conditions of the Notes as they apply to the Global Note. The following is a summary of certain of those provisions:

Payments: All payments in respect of the Global Note will be made against presentation and (in the case of payment of principal in full with all interest accrued thereon) surrender of the Global Note to or to the order of any Paying Agent and will be effective to satisfy and discharge the corresponding liabilities of the Issuer in respect of the Notes. On each occasion on which a payment of principal or interest is made in respect of the Global Note, the Issuer shall procure that in respect of a CGN the payment is noted in a schedule thereto and in respect of an NGN the payment is entered *pro rata* in the records of Euroclear and Clearstream, Luxembourg.

Exercise of put option: In order to exercise the option contained in Condition 9(e) (*Redemption at the option of Noteholders*) the bearer of the Permanent Global Note must, within the period specified in the Conditions for the deposit of the relevant Note and put notice, give written notice of such exercise to the Principal Paying Agent specifying the principal amount of Notes in respect of which such option is being exercised. Any such notice will be irrevocable and may not be withdrawn.

Partial exercise of call option: In connection with an exercise of the option contained in Condition 9(c) (A) (*Redemption at the option of the Issuer*), Condition 9(c) (B) (*Issuer Refinancing Call*) or Condition 9(c) (C) (*Make-whole Redemption by the Issuer*), in relation to some only of the Notes, the Permanent Global Note may be redeemed in part in the principal amount specified by the Issuer in accordance with the Conditions and the Notes to be redeemed will not be selected as provided in the Conditions but in accordance with the rules and procedures of Euroclear and Clearstream, Luxembourg (to be reflected in the records of Euroclear and Clearstream, Luxembourg as either a pool factor or a reduction in principal amount, at their discretion).

Notices: Notwithstanding Condition 19 (*Notices*), while all the Notes are represented by a Permanent Global Note (or by a Permanent Global Note and/or a Temporary Global Note) and the Permanent Global Note is (or the Permanent Global Note and/or the Temporary Global Note are) deposited with a depositary

or a common depository for Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system or a common safekeeper, notices to Noteholders may be given by delivery of the relevant notice to Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system and, in any case, such notices shall be deemed to have been given to the Noteholders in accordance with Condition 19 (*Notices*) on the date of delivery to Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system, except that, for so long as such Notes are admitted to trading on Euronext and it is a requirement of applicable law or regulations, such notices shall be published (i) in at least one daily newspaper of wide circulation in The Netherlands and (ii) if and for so long as the Notes are listed on Euronext in such form as the rules of that exchange require.

DESCRIPTION OF THE ISSUER

Incorporation, Address Details and Share capital

The Issuer's legal and commercial name is Stedin Holding N.V. (until 31 January 2017 named Eneco Holding N.V.).

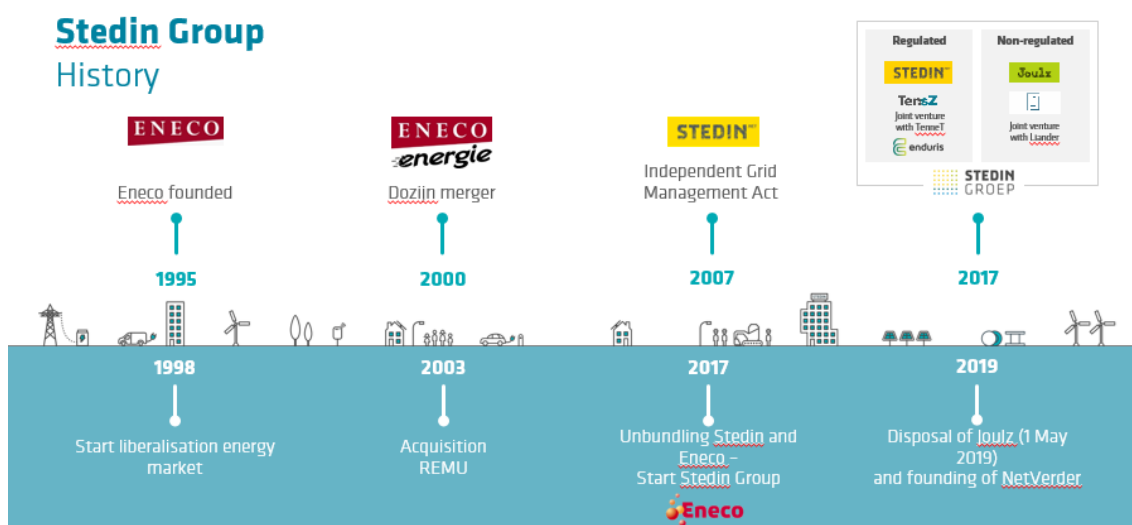

The Issuer was established as a public limited liability company (*naamloze vennootschap*) for an unlimited term under the laws of The Netherlands on 5 June 2000. It has its registered seat in Rotterdam, The Netherlands, and its principal place of business at Blaak 8, 3011 TA Rotterdam, The Netherlands and the telephone number of its principal place of business is +31 88 89 63 963. The Issuer is registered in the Trade Register at the Dutch Chamber of Commerce under number 24306393.

The Issuer's website is <https://www.stedingroep.nl>. Information on the aforementioned website does not form part of this Base Prospectus unless such information is incorporated by reference into this Base Prospectus.

The Issuer's Articles of Association were last amended by notarial deed on 16 April 2018.

The Issuer's authorised share capital is EUR 2 billion, divided into 20 million shares with a nominal value of EUR100 each. At 31 December 2018, 4,970,978 shares had been issued and fully paid. The Issuer has only issued ordinary shares. Stedin Holding N.V is currently 100 per cent. owned by 44 municipalities in The Netherlands, including the municipalities of Rotterdam (31.7 per cent.), The Hague (16.6 per cent.) and Dordrecht (9.1 per cent.). The remaining 41 municipalities each own less than 5.0 per cent. of the shares. No single shareholder has a controlling interest in the Issuer. However, the three largest shareholders have a majority interest in the Issuer of 57 per cent. Privatisation is not permitted under Dutch law.

History and Development of Stedin Group

Stedin Group's origin dates back to the middle of the nineteenth century.

In The Netherlands, utility companies were traditionally owned by municipalities and provinces. Since the 1980's, significant voluntary consolidation has occurred in order to improve efficiency of operations. In 1995, the utility companies of the municipalities of The Hague, Dordrecht and Rotterdam merged to create the integrated utility company Eneco. REMU, a major energy distributor for the province of Utrecht, was acquired in 2003. In the period 2000-2007 a number of small Dutch energy companies and grids have been acquired.

Unbundling

In April 2007, the unbundling of the energy generation and supply from the distribution activities became mandatory pursuant to a ministerial decision on the basis of the Electricity Act 1998 and Gas Act

(containing the unbundling provisions of the 'independent network management act' (*Wet Onafhankelijk Netbeheer*, also known as the Unbundling Act)).

Following this decision, legal proceedings were initiated to contest the validity of the unbundling provisions. As a consequence of a ruling of the Court of Appeal (*Gerechtshof*) in The Hague in June 2010, the unbundling provisions were not in force. However, the Dutch State appealed to this ruling with the Dutch Supreme Court (*Hoge Raad*). Following a decision by the Court of Justice of the European Union on prejudicial questions asked by the Dutch Supreme Court, the Supreme Court had to determine whether the alleged restrictions on the free movement of capital and freedom of establishment, contained in the unbundling provisions, were appropriate to the objectives pursued. The Dutch Supreme Court issued a ruling on the forced unbundling of Dutch integrated energy companies on 26 June 2015 and stated that the relevant unbundling provisions are not in conflict with European Union legislation on the free movement of capital and freedom of establishment. The Supreme Court referred judgement on whether the unbundling provisions constitute an infringement of the right to the protection of property described in the First Protocol to the European Convention on Human Rights, to the Court of Appeal in Amsterdam. In November 2016, the Court of Appeal dismissed the appeal. This ended the legal proceedings against the unbundling provisions, and consequently unbundling was inevitable.

Although at the time the legal proceedings were still pending before the Court of Appeal in Amsterdam, the ACM issued an enforcement decree in December 2015, forcing Eneco Holding N.V. to unbundle by ultimately 31 January 2017.

On 31 January 2017, Eneco Holding N.V. was unbundled to create the energy company Eneco Groep N.V. ("**Eneco Group**") and the network group with the grid operator, Stedin Group, by distributing all the shares in Eneco Group as a dividend in kind to the shareholders of Eneco Holding N.V..

On 31 January 2017, Eneco Holding N.V. was renamed Stedin Holding N.V. The only remaining relationships between Eneco Group and Stedin Group consist of a regular business relationship that Stedin Group has with all energy companies who are using the grids of Stedin Group. These include activities relating to invoicing and collecting amounts from consumers.

Recent acquisition and divestments

On 24 May 2018, Stedin Group divested Joulz Energy Solutions B.V. ("**JES**") as legislation forces distribution network companies as Stedin Group to focus on regulated core activities and limits the commercial activities they can undertake. JES is active in the field of medium and high voltage infrastructure. The sale price has not been made public but can be considered as non-material in relation to the size of the Issuer.

On 30 April 2019, Stedin Group divested 100% of the shares in Joulz Diensten B.V. ("**Joulz**") to 3i Infrastructure PLC for a total consideration of EUR 310.4 million. Strategic rationale for the divestment is that legislation forces distribution network companies as Stedin Group to focus on regulated core activities and limits the commercial activities they can undertake. Joulz is active in the field of rental, maintenance and operation of commercial meters and transformers.

Profile of Stedin Group and Stedin Holding N.V.

Stedin Group focuses on all activities relating to constructing, managing and maintaining energy grids. It also facilitates the energy market. More than 2.2 million retail customers, businesses and industrial customers rely on Stedin Group for their energy supply. Energy is indispensable in the world in which we live. The grid operators within Stedin Group, Stedin Netbeheer and Enduris, work with other parties forming part of the energy system: the producers of gas and electricity, the suppliers, the other grid operators and the organisations which monitor the reliability, affordability, safety and sustainability of the grids. The electricity and gas grids are a key link in the energy system. Stedin Group is proud that its grids are among the most reliable in the world. At the same time, it is part of a far-reaching societal shift: the urgent transition from an economy that is largely based on the use of fossil energy sources to a clean economy based on renewable sources. Stedin Netbeheer and Enduris operate alongside five other regional grid operators in a regulated market. Each regional grid operator is a monopolist in its area of operations.

The Issuer is the holding company of the Stedin Group and the Issuer's income depends on dividends received from its subsidiaries. The Issuer holds full ownership of the regulated grid operators Stedin Netbeheer and Enduris and the non-regulated infrastructure specialist DNWG Infra.

Stedin Group consists of the operating entities:

Stedin Netbeheer and DNWG, which manage and maintain the energy grids in a large part of the Randstad conurbation and the Provinces of Utrecht and Zeeland, thereby covering three of the four largest cities in The Netherlands, the Port of Rotterdam and the port of Zeeland and large industrial and glasshouse horticulture regions. Parts of the Provinces of Noord-Holland and Friesland also fall within our area of operations.

DNWG Infra is the service provider that builds and maintains the electricity and gas grids in the Province of Zeeland, on behalf of Enduris. In addition, DNWG Infra maintains and manages the grids of other grid operators (e.g. Evides Waterbedrijf, Stedin Netbeheer and TenneT) entrusted to it, and of industrial customers. DNWG Infra also supplies services in the area of metering technology in Zeeland and elsewhere, and is an approved party responsible for metering.

NetVerder takes the energy transition further with the development, realization and maintenance of energy infrastructures for heat, steam and biogas. NetVerder is also actively engaging in independent transport and distribution of other new energy forms and carriers. NetVerder is an independent part of Stedin Group.

Subsidiaries of Stedin Holding N.V. (in alphabetical order, as at the date of this Base Prospectus):

- DNWG Groep N.V.
- DNWG Infra B.V.
- DNWGWarmte B.V.
- DNWG Staff B.V.
- Enduris B.V.
- NetVerder B.V.
- N.V. Stedin Netten Noord-Holland
- N.V. Stedin Noord-Oost Friesland
- Stedin Groep Personeels B.V.
- Stedin Netbeheer B.V.
- Stedin Netten B.V.

The Issuer also participates in three active joint ventures: Utility Connect B.V., Tenz B.V. and TeslaN B.V. Utility Connect is active in the field of reading measurement data from smart meters using the data bandwidth of a CDMA-based telecommunications network. Tenz is the management organisation of Tennet and Stedin Netbeheer for joint assignments related to management and maintenance of medium-voltage and high-voltage grids and installations. TeslaN performs similar activities as Tenz only between Tennet and Enduris.

Corporate Strategy

It is the objective of Stedin Group to work together to create an environment filled with new energy. To achieve this objectives Stedin Group has formulated three strategic priorities:

- Improved grid management by continuous improvement of core task execution (reliable grids, affordable and efficient services, high-quality products and services)
- Facilitating the energy transition through innovation and by close collaboration with partner (future-proof grids, making grid information available and accelerating through cooperation)
- Sustainable business operations (safe working conditions, professionally competent employees now and in the future, positive environmental impact and financial health)

Stedin Group acts as an independent party. It explicitly opts for cooperation with market parties, which it fully facilitates in developing new products and services, to enable the future energy supply together. This includes proactively sharing data about the network.

In compliance with this independent role, Stedin Group exerts modesty in taking up activities that place Stedin Group in competition with market parties. These activities must demonstrably contribute to its core task, or provide for a gap in the market for which Stedin Group is uniquely positioned.

Stedin Group has a social responsibility, namely the realisation, management and maintenance of a reliable, secure, affordable and sustainable energy infrastructure for its customers.

Stedin Group also adopted the 'One Planet Thinking' concept and implemented the derived responsibilities in its business management. This means that it actively seeks to reduce its environmental footprint by actively managing the use of energy and raw materials.

The regulatory framework

The Energy Department of the ACM supervises the correct implementation of the Electricity Act 1998 (*Elektriciteitswet 1998*) and the Gas Act (*Gaswet*). The ACM ensures the effective and efficient functioning of the energy market and the protection of customer interests through the implementation of various regulatory instruments. This includes safeguarding access to networks, maintaining sufficient transparency (access to essential information) and protecting consumers against potential malpractices.

The ACM monitors the capability of the Grid Companies to meet the financial requirements for managing the electricity and gas grid, including required and planned investments. The Grid Companies submit their statutory and regulatory financial statements to the ACM annually, including results, assets and infrastructure related activities (maintenance and investments). Furthermore end-user tariffs for the distribution of electricity and gas (which generates the revenues for the Grid Companies) are controlled by the ACM and depend on a series of consecutive regulatory decisions, in particular the Regulation Method

Decision, the Efficiency Discount Decision (x-factor), Quality Factor Decision (q-factor) and the Accounting Volume Decision, which are applicable to a certain price control period, and finally the annual tariff decisions.

The Method Decisions for the new regulatory period published by the ACM at the end of 2016 apply for the longest legally possible period of 5 years. By opting for this long term, the ACM aims to stimulate Dutch grid operators to operate efficiently and also to offer customers as much tariff stability as possible.

For the current regulation period (2017 – 2021), the Efficiency Discount Decision (x-factor) will lead to annually decreasing transport tariffs for gas and electricity. As the Issuer's revenue significantly depends on the transport tariffs (as determined by the regulatory framework described above) this will have a negative impact on its financial position and cash flows.

The level of permitted revenues of the Grid Companies includes a component based on the real weighted average costs of capital (WACC). The variables used to calculate the WACC consist of estimates for the cost of equity, the cost of debt, the relative percentages of debt and equity in the capital structure, the corporate tax rate and the consumer price index. The cost of equity represents the expected return on investment for the shareholders. The Issuer is the sole direct and indirect shareholder of the Grid Companies. The cost of debt represents the expected cost of debt for a company with an "A" credit rating. As is the case for almost all other cost factors, the ACM bases the WACC on data preceding the regulation period for which the WACC is determined. Thus, the WACC may incorrectly reflect the costs of capital which the Grid Companies will effectively incur during the relevant regulation period. For the current tariff regulation period (2017 - 2021), the estimated cost of equity is set at 5.02 per cent. while the cost of debt develops from 3.58 per cent. at the theoretical starting point of 2016 to 2.29 per cent. in 2021. In addition, the actual capitalisation of the Grid Manager may differ from the 50/50 debt/equity ratio assumed in the Method Decisions, which would also have an impact on the profitability of the Grid Companies. Finally, the actual corporate tax rate may deviate from the corporate tax rate assumed in the Method Decisions, which would have an impact on the profitability of the Grid Companies.

Changes to both the Electricity Act and Gas Act have recently passed in parliament. The financial impact of losses in the gas networks are now the responsibility of the Grid Companies per 1 January 2020. In addition, the entire connection of wholesale customers in the gas market will be a tariff-regulated task per 1 January 2020 (formerly non-regulated business). The regulator provides extra tariff space to accommodate these new tasks.

Capital market and money market activities

The Issuer has increased its EMTN Programme from EUR 2 billion to EUR 3 billion. At year-end 2018, senior bonds totalling EUR 1.3 billion and a EUR 500 million perpetual hybrid loan, had been issued.

In the last quarter of 2018 the Issuer repaid early in total EUR 152 million of Schuldschein loans and multiple bank loans. In the first half of 2019 another Schuldschein tranche of EUR 33 million and USPP Notes with an equivalent euro amount of EUR 275 million were both repaid at maturity.

The Issuer also has a EUR 750 million ECP programme. No amount was issued under the ECP programme as at 31 December 2018.

The Issuer has available a committed backup revolving credit facility for an amount of EUR 600 million with six banks. The facility is available until July 2024. The facility is undrawn as per the date of this Base Prospectus.

Financing and banking policy

Stedin Group has access to the capital and money markets, optimises its financing structure and costs in conjunction with financial parameters set by the regulator in each regulatory period and minimises its financing risks. The financing policy is designed to ensure timely and permanent financing and is approved by the Supervisory Board.

Stedin Group maintains long-term relationships with at least six banks to secure the availability of adequate stand-by banking facilities. These banks are Dutch banks as well as international banks which have adequate standing, offer a wide range of products and have strong credit ratings.

The financing and banking policy is implemented by its treasury department which duties include amongst others:

- advising on and effecting external and internal funding transactions;
- conduct of day-to-day cash management;
- mitigating exchange-rate, inflation and interest-rate risks; and
- maintaining contacts with banks, rating agencies and other financial stakeholders regarding treasury-related matters.

The treasury department has no profit target and is a value-added centre. It uses a conservative financial policy regarding open financial positions and derivatives. The treasury department acts in accordance with its mandate as described in the "Treasury charter".

Credit rating

The Issuer has a public rating by S&P since 2001. In S&P's report of 31 July 2019, the "A- with a stable outlook" long-term corporate credit ratings of each of the Issuer and Stedin Netbeheer have been affirmed. The stable outlook reflects S&P's view that the Issuer will be able to maintain a 11.5%-13% ratio of funds from operations to debt over the medium term.

The Issuer has a long-term credit rating target of an A rating profile (minimum of an A/A2 rating with a stable outlook) which provides a buffer in relation to the minimum statutory required creditworthiness of an 'investment grade rating (BBB/Baa2)' for the Issuer, as stated in the Financial Management of Grid Managers Decree (*Besluit Financieel Beheer Netbeheerders*).

Dividend policy

The articles of association of the Issuer contain provisions concerning profit appropriation. The articles of association state that, in principle, 50% of the profit is eligible for dividend distributions, excluding incidental income.

Over 2018, the Issuer has designated EUR 14 million as incidental income resulting from the release of deferred taxation due to future changes in the corporate income tax rate. Over 2017, the Issuer has designated EUR 355 million as incidental income, resulting from income arising from the unbundling from the Eneco Group.

Litigation

The Issuer received a claim on 14 June 2019 which relates to the sale of the shares the Issuer previously held in Joulz Energy Solutions B.V. (**JES**) and the relevant Share Purchase Agreement. The claim relates to an adjustment of the purchase price for the JES shares for the valuation of transferred work under construction at the date of transfer of shares. The subject of debate between parties in the pending summary proceedings is which forum would be competent to determine the purchase price adjustment. Purchaser has furthermore announced its intention to initiate substantive proceedings claiming additional amounts, to date however, purchaser has not filed such a second claim. The Issuer has since the financial year ending 2018 accounted the result of the divestment of JES including a repayable amount of the received purchase price for the mentioned dispute over the valuation of transferred work under construction following the first claim.

Management of Stedin Holding N.V.

The members of the Management Board of the Issuer are appointed by its Supervisory Board. The Management Board is ultimately responsible for the performance of Stedin Group. It develops the corporate strategy and long-term planning, monitors the risk profile, directs the business and corporate management, and approves the key performance indicators and the business plans of the business units. In addition, the Management Board manages on the basis of clear mandates from the Supervisory Board and prepares the financial statements.

TAXATION

The following is a general description of certain Dutch tax considerations relating to the Notes. It does not purport to be a complete analysis of all tax considerations relating to the Notes, whether in those countries or elsewhere. Prospective purchasers of Notes should consult their own tax advisors as to which countries' tax laws could be relevant to acquiring, holding and disposing of Notes and receiving payments of interest, principal and/or other amounts under the Notes and the consequences of such actions under the tax laws of those countries. This summary is based upon the law as in effect on the date of this Base Prospectus and is subject to any change in law that may take effect after such date.

TAXATION IN THE NETHERLANDS

The following summary of certain Dutch taxation matters is based on the laws and practice in force as of the date of this Base Prospectus and is subject to any changes in law and the interpretation and application thereof, which changes could be made with retroactive effect. The following summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to acquire, hold or dispose of a Note or Coupon, and does not purport to deal with the tax consequences applicable to all categories of investors, some of which may be subject to special rules.

For the purpose of the paragraph "*Taxes on Income and Capital Gains*" below, it is assumed that a holder of a Note, being an individual or a non-resident entity, does not have nor will have a substantial interest (*aanmerkelijk belang*), or - in the case of a holder of a Note being an entity - a deemed substantial interest, in the Issuer and that no connected person (*verbonden persoon*) to the holder of a Note has or will have a substantial interest in the Issuer.

Generally speaking, an individual has a substantial interest in the Issuer if (a) such individual, either alone or together with his partner, directly or indirectly has, or is deemed to have or (b) certain relatives of such individual or his partner directly or indirectly have or are deemed to have, (I) the ownership of, a right to acquire the ownership of, or certain rights over, shares representing 5 per cent. or more of either the total issued and outstanding capital of the Issuer or the issued and outstanding capital of any class of shares of the Issuer, or (II) the ownership of, or certain rights over, profit participating certificates (*winstbewijzen*) that relate to 5 per cent or more of either the annual profit or the liquidation proceeds of the Issuer.

Generally speaking, a non-resident entity has a substantial interest in the Issuer if such entity, directly or indirectly has (I) the ownership of, a right to acquire the ownership of, or certain rights over, shares representing 5 per cent. or more of either the total issued and outstanding capital of the Issuer or the issued and outstanding capital of any class of shares of the Issuer, or (II) the ownership of, or certain rights over, profit participating certificates (*winstbewijzen*) that relate to 5 per cent. or more of either the annual profit or the liquidation proceeds of the Issuer. An entity holding a Note has a deemed substantial interest in the Issuer if such entity has disposed of or is deemed to have disposed of all or part of a substantial interest on a non-recognition basis.

For the purpose of this summary, the term "**entity**" means a corporation as well as any other person that is taxable as a corporation for Dutch corporate tax purposes.

Where this summary refers to a holder of a Note, an individual holding a Note or an entity holding a Note, such reference is restricted to an individual or entity holding legal title to as well as an economic interest in such Note or otherwise being regarded as owning a Note for Dutch tax purposes. It is noted that for purposes of Dutch income, corporate, gift and inheritance tax, assets legally owned by a third party such as a trustee, foundation or similar entity, may be treated as assets owned by the (deemed) settlor, grantor or similar originator or the beneficiaries in proportion to their interest in such arrangement.

Where the summary refers to "**The Netherlands**" or "**Dutch**" it refers only to the European part of the Kingdom of The Netherlands.

Investors should consult their professional advisors on the tax consequences of their acquiring, holding and disposing of a Note or Coupon.

Withholding tax

All payments of principal and interest by the Issuer under a Note can be made without withholding or deduction of any taxes of whatever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein.

Taxes on income and capital gains

Residents

Resident entities

An entity holding a Note which is or is deemed to be resident in The Netherlands for Dutch corporate tax purposes and which is not tax exempt, will generally be subject to Dutch corporate tax in respect of income or a capital gain derived from a Note at the prevailing statutory rate (up to 25 per cent. in 2019).

Resident individuals

An individual holding a Note who is resident or is deemed to be resident in The Netherlands for Dutch income tax purposes will be subject to Dutch income tax in The Netherlands in respect of income or a capital gain derived from a Note at the prevailing statutory rates (up to 51.75 per cent. in 2019) if:

- (i) the income or capital gain is attributable to an enterprise from which the holder derives profits (other than as a shareholder); or
- (ii) the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) as defined in the Income Tax Act (*Wet inkomstenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

If neither condition (i) nor (ii) applies, such individual will generally be subject to Dutch income tax on the basis of a deemed return, regardless of any actual income or capital gain derived from the Notes. For 2019, the deemed return ranges from 1.94 per cent. to 5.60 per cent. of the value of the individual's net assets as at the beginning of the relevant fiscal year (including the Notes). The applicable rates will be updated annually on the basis of historic market yields. Subject to application of certain allowances, the deemed return will be taxed at the prevailing statutory rate (30 per cent. in 2019).

Non-residents

A holder of a Note which is not, and is not deemed to be resident in The Netherlands for the relevant tax purposes will not be subject to Dutch taxation on income or a capital gain derived from a Note unless:

- (i) the income or capital gain is attributable to an enterprise or part thereof which is either effectively managed in The Netherlands or carried on through a permanent establishment (*vaste inrichting*) or permanent representative (*vaste vertegenwoordiger*) taxable in The Netherlands and the holder of a Note derives profits from such enterprise (other than by way of the holding of securities); or
- (ii) the holder is an individual and the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) in The Netherlands as defined in the Income Tax Act (*Wet inkomstenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

- (i) the holder of a Note is or is deemed to be resident in The Netherlands for the purpose of the relevant provisions; or
- (ii) the transfer is construed as an inheritance or gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in The Netherlands for the purpose of the relevant provision.

Value added tax

There is no Dutch value added tax payable by a holder of a Note in respect of payments in consideration for the acquisition of a Note, payments of principal or interest under a Note, or payments in consideration for a disposal of a Note.

Other taxes and duties

There is no Dutch registration tax, stamp duty or any other similar Dutch tax or duty payable in The Netherlands by a holder of a Note in respect of or in connection with the execution, delivery and/or enforcement by legal proceedings (including any foreign judgment in the courts of The Netherlands) of a Note or the performance of the Issuer's obligations under a Note.

Residence

A holder of a Note will not be and will not be deemed to be resident in The Netherlands for Dutch tax purposes and, subject to the exceptions set out above, will not otherwise become subject to Dutch taxation, by reason only of acquiring, holding or disposing of a Note or the execution, performance, delivery and/or enforcement of a Note.
